Unit 4: Chemical Equilibrium

U4D1 October 15-16 (W/Th) - This slide will also be in the U3 Daily Agenda

Learning Target: How is rate related to equilibrium?

Agenda:

~Finish Lab!

~Review Unit 3

~Lab Simulation: Penny Ante Equilibrium

Homework:

~Unit 3 Practice (Textbook) due before test

~U3 Exam next time

~Penny Ante Equilibrium due 10/23-24

U4D1 (cont) October 22-23 (W/Th)

Learning Target: How is rate related to equilibrium?

Agenda:

~PSAT for period 2

~Finish Lab Simulation: Penny Ante Equilibrium (per 3/5)

Homework:

~None

~Start listening to Lectures?

U4D2 October 24-27 (F/M) -

Learning Target: What is an equilibrium expression?

Agenda:

~Review Unit 3 Exam

~New Unit! U4 Chemical Equilibrium

~Discuss Penny Ante Lab

~Notes and Practice: Equilibrium Expressions

Homework:

~Textbook Problems U4 Practice 1 posted

U4D3 October 28-29 (T/W) -

Learning Target: How can equilibrium position be understood?

Agenda:

~Warm up! On a WHITE BOARD: For the decomposition of iron (III) chloride:

$$FeCl_3\ (aq) + 3\ Na\ (s) \rightleftarrows 3\ NaCl\ (aq) + Fe\ (s) \qquad K_{eq} = 1.0 \times 10^{11}$$

a. Write an expression for the reaction quotient
b. Calculate the value of Q if the concentration of all aqueous substances is 0.20 M.
c. Is the system at equilibrium? If not, which direction, forward or reverse, will the reaction shift?
d. Write a K expression for the reverse reaction,

$$3\ NaCl\ (aq) + Fe\ (s) \rightleftarrows FeCl_3\ (aq) + 3\ Na\ (s).$$

Hypothesize about the value of K for this reaction.

~Notes and Practice: Equilibrium Manipulations, Q vs K, Size of K

Homework:

~Textbook Problems U4 Practice Nov 2/3 11:55 pm

~Quiz Nov 3/4

~U4 Exam 11/12-13

~Warm up! On a WHITE BOARD: For the decomposition of iron (III) chloride:

$$FeCl_3\ (aq) + 3\ Na\ (s) \rightleftarrows 3\ NaCl\ (aq) + Fe\ (s) \quad K_{eq} = 1.0 \times 10^{11}$$

a. Write an expression for the reaction quotient

b. Calculate the value of Q if the concentration of all aqueous substances is 0.20 M.

c. Is the system at equilibrium? If not, which direction, forward or reverse, will the reaction shift?

d. Write a K expression for the reverse reaction,

$$3\ NaCl\ (aq) + Fe\ (s) \rightleftarrows FeCl_3\ (aq) + 3\ Na\ (s).$$

Hypothesize about the value of K for this reaction.

U4D4 October 30-31(Th/F) -

Learning Target: How do reactions respond to disruption to equilibrium?

Agenda:
~Let's Practice! With a buddy or by yourself, go to this website and see if you can predict shifts.
~Notes and Practice: Le Chatelier's Principle

Homework:
~Textbook Problems U4 Practice Nov/2-3 11:55 pm
~Le Chatelier Practice
~Quiz 11/3-4
~U4 Exam 11/12-13

U4D5 November 3-4 (M/T) -

Learning Target: How do we calculate concentrations at equilibrium?

Agenda:

~Quiz!

~Equilibrium Concentration Calculations

Homework:

~Textbook Problems U4 Practice 2 11/11-12 11:55 pm

~U4 Exam 11/12-13

U4D6 November 5-6 (W/Th) -

Learning Target: How do we calculate concentrations at equilibrium?

Agenda:
~Review Quiz
~Finish up Pink Packet
~Review?

Homework:
~Textbook Problems U4 Practice 2 11/11-12 11:55 pm
~U4 Exam 11/12-13

U4D7/U5D1 November 10-11 (M/T) -

Learning Target: How do we express the energy released or gained in a process?

Agenda:
~Review Equilibrium
~New Pink Packet! U5: Thermochemistry

Homework:
~Textbook Problems U4 Practice 2 11/11-12 11:55 pm
~U4 Exam 11/12-13

U4D8 November 12-13 (W/Th) -

Learning Target: What have you learned about Equilibrium?

Agenda:
~Unit 4 Exam

Homework:
~None
