

Newton's Third Law

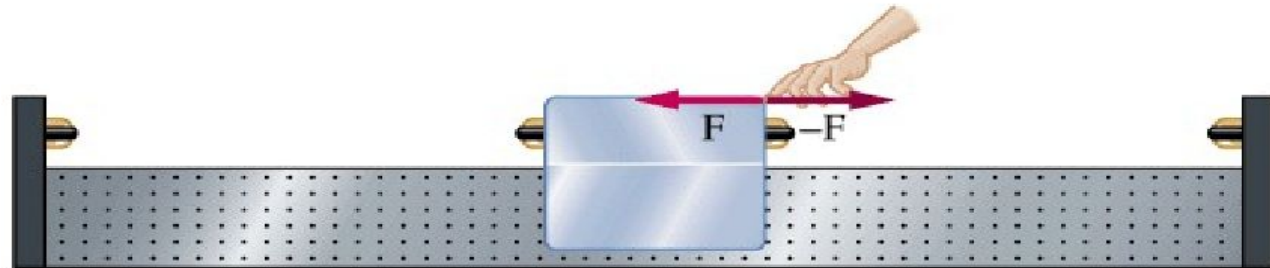

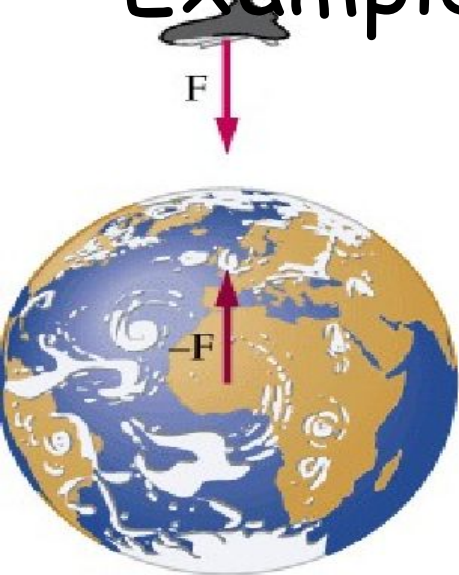

Newton's Third Law

- For every action force there exists an equal and opposite reaction force.
- If A exerts a force F on B, then B exerts a force of $-F$ on A.

Examples of Newton's 3rd Law

Sample Problem

You rest an empty glass on a table.

- a) How many forces act upon the glass?
- b) Identify these forces with a free body diagram.
- c) Are these forces equal and opposite?
- d) Are these forces an action-reaction pair?

NEWTON'S THIRD LAW

- Draw the Free-Body diagram for a box of mass, m_1 , sitting on top of a box of mass, m_2 .
-
