

Name: _____ Period: _____

Fall Final Exam Review Guide: Major Grade due at the beginning of Final Exam Class

What I should know:	Directions: After reviewing the information to the left, using your class notes & presentations and Chapter readings, write definitions, explanatory notes, pictures or symbols here to help you review. It's also important to know how to APPLY these concepts. What real-world examples can you think of to record below? Every concept should have corresponding notes in the right column.
Unit 1- Thinking Geographically 1.1 Introduction to Maps ● I can identify maps and information on maps ○ Reference Maps ○ Thematic Maps ● I can identify spatial patterns and relationships portrayed in maps ○ Absolute and relative distance ○ Absolute and relative direction ○ Clustering ○ Dispersal ○ Elevation ● I can identify how map projections distort spatial relationships ○ Distance, direction, shape, and area 1.2 Geographic Data ● I can identify different methods of geographic data collection ○ Geographic information systems - GIS ○ Satellite navigation systems - GPS ○ Remote sensing ○ Online mapping and visualization ● I can identify various types of spatial information gathered 1.3 The Power of Geographic Data ● I can explain the geographical effects of decisions made using geographical information such as: ○ Census data ○ Satellite imagery ● I can explain how the above are used for decision-making purposes by the following: ○ Personal ○ Business and organizational ○ Governmental 1.4 Spatial Concepts ● I can define major geographic concepts that illustrate spatial relationships ○ Absolute and relative locations	

- Space
- Place
- Distance decay
- Time-space compression
- Patterns

1.5 Human Environment Interaction

- I can explain how major geographic concepts illustrate spatial relationships
 - Sustainability
 - Natural resources
 - Land use
- I can explain theories about how humans interacted with natural environments
 - Environmental determinism
 - Possibilism

1.6 Scale of analysis

- I can define scales of analysis used by geographers
 - Global
 - Regional
 - National
 - Local
- I can explain what scales of analysis reveal
 - Variations in data
 - Different interpretation of data

1.7 Regional Analysis

- I can describe different ways that geographers define regions
 - One or more unifying characteristics
 - Patterns of activity
- I can identify and explain the types of regions
 - Formal
 - Functional
 - Perceptual/Vernacular
- I can explain how geographers apply regional analysis at local, national, and global scales

Unit 1 Big Ideas

Be able to fully and confidently answer these questions.

1. Describe the five themes of geography and how they help geographers answer geographic questions/think spatially.
2. Why do geographers use maps? What do maps tell us?
3. Define scales of analysis. How are they used for analyzing patterns and processes?
4. Define the three types of regions and give an example for each.
5. Describe the role of geographic technologies, such as GIS, remote sensing, and GPS, in helping geographers analyze geographic phenomena.

Unit 2- Population & Migration

2.1 Population Distribution

- I can identify the factors that influence the distribution of human populations at different scales.
 - Physical factors - climate, landforms, water bodies
 - Human factors - culture, economics, history, politics
- I can define methods geographers use to calculate population density
 - Arithmetic
 - Physiological
 - Agricultural
- I can explain the differences between and the impact of methods used to calculate population density.
 - Reveals different information about the pressure the population exerts on the land.

2.2 Consequences of Population Distribution

- I can explain how population distribution and density affect society and the environment.

- Specifically affect political, economic, and social processes, including the provision of services such as medical care.
- Carrying capacity

2.3 Population Composition

- I can describe elements of population composition used by geographers.
 - Patterns vary across different regions and may be mapped and analyzed at different scales.
- I can explain ways that geographers depict and analyze population composition.
 - Population pyramids are used to assess population growth and decline and to predict markets for goods and services.

2.4 Population Dynamics

- I can explain the factors that account for contemporary and historical trends in population growth and decline.
 - Demographic factors are fertility, mortality, and migration.
 - Geographers use the rate of natural increase and population-doubling time to explain population growth and decline.
 - Social, cultural, political, and economic factors influence fertility, mortality, and migration rates.

2.5 The Demographic Transition Model

- I can explain theories of population growth and decline.
 - The demographic transition model can be used to explain population change over time.
 - The epidemiological transition explains causes of changing death rates.

2.6 Malthusian Theory

- I can explain theories of population growth and decline used to analyze population change and its consequences
 - Malthusian theory
 - Neo-malthusians

2.7 Population Policies

- I can explain the intent and effects of various long - and short-term population and immigration policies on population size and composition.
 - Population policies that promote or discourage population growth
 - Pronatalist
 - Antinatalist
 - Immigration policies.

2.8 Women and Demographic Change

- I can explain how the changing role of females has demographic consequences that have reduced fertility rates in most parts of the world.
 - Changing social values
 - Access to education
 - Employment
 - Health care
 - Contraception
- I can explain how the changing social, economic, and political roles for females have influenced patterns of fertility, mortality, and migration
 - Ravenstein's laws of migration

2.9 Aging Populations

- I can explain the causes and consequences of an aging population.
 - Population aging is determined by birth and death rates and life expectancy.
 - An aging population has political, social, and economic consequences, including the dependency ratio.

2.10 Causes of Migration

- I can explain how different causal factors encourage migration.
 - Push factors
 - Pull factors
 - Intervening opportunities/obstacles
 - Can be cultural, demographic, economic, environmental, or political.

Unit 2 Big Ideas

Be able to fully and confidently answer these questions.

1. Explain the relationship between people and the environment using arithmetic and physiological population densities.
2. Describe the Malthusian theory.
3. Explain the causes of and ESPN implications of an aging population.
4. Describe three real-world examples of different patterns of fertility, mortality, and health around the world and the factors that influence them.
5. Describe the reasons for and the effects of population policies.

Unit 3- Cultural Patterns & Processes

3.1 Introduction to Culture

- I can define the characteristics, attitudes, and traits that influence geographers when they study culture.
 - Culture comprises the shared practices, technologies, attitudes, and behaviors transmitted by a society
 - Cultural traits
 - Food preferences, architecture, and land use
 - Cultural attitudes
 - Relativism and ethnocentrism

3.2 Cultural Landscapes

- I can describe the characteristics of cultural landscapes.
 - Combination of physical features, agricultural and industrial practices, religious and linguistic

characteristics, evidence of sequent occupancy, and architecture.

- I can explain how landscape features and land and resource use reflect cultural beliefs and identities.
 - Attitudes toward ethnicity and gender
 - Ethnic neighborhoods
 - Indigenous communities

3.3 Cultural Patterns

- I can explain patterns and landscapes of language, religion, ethnicity, and gender
 - Regional patterns contribute to a sense of place
 - Centripetal/centrifugal forces

3.4 Types of Diffusion

- I can define the interaction of people through the types of diffusion that contribute to the spread of cultural practices.
 - Relocation
 - Expansion
 - Contagious
 - Hierarchical
 - Stimulus

3.5 Historical Causes of Diffusion

- I can explain how historical processes impact current cultural patterns.
 - Interactions between cultural traits can lead to new forms of cultural expression
 - Creolization and lingua franca
 - Colonialism, imperialism, and trade helped to shape patterns of culture

3.6 Contemporary Causes of Diffusion

- I can explain how historical processes impact current cultural patterns.
 - Cultural ideas and practices are socially constructed and change through both small-scale and large-scale processes
 - Urbanization
 - Globalization
- These processes come to bear on culture through
 - Media
 - Technological change
 - Politics
 - Economic
 - Social relationship

- Communication technologies are reshaping and accelerating interactions among people
 - Internet and the time-space convergence
 - Changing cultural practices increasing use of English
 - Loss of indigenous languages
 - Cultural convergence and divergence

3.7 Diffusion of Religion and Language

- I can explain what factors lead to the diffusion of universalizing and ethnic religions
 - Diffuse from cultural hearths
 - Practices and belief systems impacted how widespread the religion diffused
 - Universalizing: Christianity, Islam, Buddhism, and Sikhism spread through relocation and expansion diffusion
 - Ethnic: Hinduism and Judaism are generally found near the hearth and diffuse through relocation

3.8 Effects of Diffusion

- I can explain how the process of diffusion results in changes to the cultural landscape
 - Acculturation,
 - Assimilation
 - Syncretism
 - Multiculturalism

Unit 3 Big Ideas

Be able to fully and confidently answer these questions.

1. How does the interaction of people contribute to the spread of cultural practices?
2. How and why do cultural ideas, practices, and innovations change over time?
3. Compare and contrast ethnic and universalizing religions.
4. Describe the regional patterns of religions.

5. Describe the regional patterns of language.

6. How do religion, language, and ethnicity contribute to a sense of place? How do they affect the cultural landscape?
