Period: _____

Unit 1: Thinking Geographically Review

**** Bonus Points Opportunity.** Partially complete reviews will not be accepted. Must be fully completed with fidelity to qualify. Use reading and class notes to complete.

Topic 1.1 - Introduction to Maps

Objective: Identify types of maps, the types of information presented in maps, and different kinds of spatial patterns and relationships portrayed in maps.

Explain the uses for the following types of maps.

A. reference (physical and political):

B. thematic (choropleth, dot distribution, graduated symbol, isoline, cartogram):

Identify some spatial patterns that are evident on various maps.

In what ways do all map projections distort information? Provide an example of a type of projection and its distortion.

Name: _____

Period: _____

Topic 1.2 - Geographic Data

Objective: Identify different methods of geographic data collection.

Explain how each of the following geospatial technologies are used to collect and interpret data.

- geographic information systems (GIS):
- satellite navigation systems (GPS):
- remote sensing:
- Census

Discuss some other ways spatial information is obtained through an individual.

Topic 1.3 - The Power of Geographic Data

Objective: Explain the geographical effects of decisions made using geographical information.

Discuss how geographic data can be used on the following scales:

- ∴ personal:
- ∴ business and organization:
- ∴ government:

Name: _____

Period: _____

Topic 1.4 - Spatial Concepts

Objective: Define major geographic concepts that illustrate spatial relationships.

Define the following terms as they apply to human geography:

- ∴ absolute location:
- ∴ relative location:
- ∴ sense of place:
- ∴ cultural landscape:
- ∴ sequent occupance:
- ∴ distance decay:
- ∴ time-space compression:
- ∴ site:
- ∴ situation:
- ∴ toponym:

Topic 1.5 - Human-Environmental Interaction

Objective: Explain how major geographic concepts illustrate spatial relationships.

Define the following terms or theories as they apply to human geography:

- ∴ human Environment Interaction:
- ∴ environmental determinism:
- ∴ environmental possibilism:

Define sustainability.

What is an example of a sustainable practice?

Name: _____

Period: _____

Topic 1.6 - Scales of Analysis

Objective: Define scales of analysis used by geographers and explain what scales of analysis reveal.

In your own words, what does the phrase “scales of analysis” mean when discussing geography?

What are the different scales that can be used to evaluate an issue?

In your own words, discuss why it is important to look at an issue at different scales.

Topic 1.7 - Regional Analysis

Objective: Describe different ways that geographers define regions.

Define and give an example of each type of region.

∴ formal:

∴ functional:

∴ perceptual/vernacular:
