

Day 10, September 11 & 12, Unit 1

Agenda:

1. 1.5 HEI Notes
2. Finish DBQ Work if you haven't already
3. HW: Study for Ch. 1 Reading Quiz

Reading Quiz Reminders:

- Ch. 1 Reading Quiz Next Class; Reading Guides due beginning of class. STUDY!
 - Everyone should be joined up to our AP Classroom (College Board Account) before next class. You must be able to access this in class.
- 

Exam Day Reminders/Info:

- 1) Unit 1 Exam: 9/15 (A Day) & 9/18 (B Day)**
 - 2) Review Guide: Due at the beginning of class on Unit 1 Exam Day (A Day- 9/15 and B Day- 9/18)**
 - 3) You will have class time after quiz on 9/13 (A day) and 9/14 (B Day) to work on review guide**
 - 4) Bring a Pencil with a good eraser on exam day.**
 - 5) 2nd and 6th Periods: You will take C Lunch to accommodate for our test.**
- 
- A decorative graphic of three green leaves with black outlines, positioned at the bottom right of the slide, partially overlapping the light blue background.

1.5 Human-Environment Interaction

Objective: Explain how major geographic concepts illustrate spatial relationships.

What is HEI?

HEI is the relationship humans have with the environment

- Modify
- Adapt
- Depend

Modify

To change

We modify the environment based on our wants and needs

Austin: BEFORE AND AFTER

EFFECTS OF MODS

- Deforestation in Europe
 - Turning Europe's vast forests into farmland & cities
 - Major cause of this = Industrial Revolution

EFFECTS OF MODIFICATION

pollution: due to industrialization & urbanization

Adapt

To adjust

We change our way of living or create new technology

Earthen Home in
Sudan
OR A/C in Texas

**PEOPLE UP NORTH AT
WINTER:**

PEOPLE IN AUSTIN DURING “WINTER”:

Depend

Use of resources to survive or make money

Types of Resources

Non-renewable

Unable to be replenished or replaced - once it's gone, it's gone.

Ex. Fossil Fuels, minerals

Renewable

Replaced naturally and can be used repeatedly - although at times we can use them up too fast (like water). Ex. Wind, Solar energy, trees for lumber

What are the Primary Goals of Sustainability?

The sustainable development professional network thinks, acts and works globally. In 2012, the United Nations Conference on Sustainable Development met to discuss and develop a set of goals to work towards; they grew out of the Millennium Development Goals (MDG) that claimed success in reducing global poverty while acknowledging there was still much more to do. The SDG eventually came up with a list of 17 items (8) which included amongst other things:

- The end of poverty and hunger
- Better standards of education and healthcare - particularly as it pertains to water quality and better sanitation
- To achieve gender equality
- Sustainable economic growth while promoting jobs and stronger economies
- All of the above and more while tackling the effects of **climate change**, pollution and other environmental factors that can harm and do harm people's health, livelihoods and lives.
- Sustainability to include health of the land, air and sea

Finally, it acknowledged the concept of nature having certain rights - that people have stewardship of the world and the importance of putting people at the forefront of solving the above global issues (9) through management of the environment and of consumption (for example, reducing packaging and discouraging food waste as well as promoting the use of recyclable materials).

Sustainability

How do we preserve the environment while also providing for the current population and the future?

What practices are considered sustainable?

Sustainable Development Goals

Cultural Ecology

The study of how humans interact with the Earth

Environmental Determinism & Possibilism

Environmental Determinism

- The environment DETERMINES your way of living
- Climate plays a big factor
 - Tropical = laid back
 - Temperate & Polar = hard working

Possibilism

- Physical environment may limit some actions, but people have the **ability to adjust** to or **overcome** their environment
- Especially with modern technology → **modifying the environment** more than ever

Philosophies of Environmental Determinism & Possibilism Reading
(read and add relevant info to your notes)

Environmental Determinism

**HUMANS ARE LIMITED BY
THEIR PHYSICAL
ENVIRONMENT;
ENVIRONMENT
STRONGLY INFLUENCES
CESP**

People have
the ability to
**TRANSCEND/OVERCOME
ENVIRONMENTAL LIMITATIONS**

Possibilism
