Unit 1.5: Development

BIG IDEA 1

Patterns and Spatial Organization **PSO**

- Why does economic and social development happen at different times and rates in different places?

BIG IDEA 3

Spatial Patterns and Societal Change **SPS**

- Why has industrialization helped improve standards of living while also contributing to geographically uneven development?

Developing Understanding

This mini unit (1.5) is designed to frontload key economic development indicators and theories that will be revisited within the context in Unit 7, Industrial and Economic Development Patterns and Processes. Specifically, Unit 1.5 introduces quantitative measurements of development (statistics and spatial data) that reveal the impact of economic and industrial development on individual populations, including the role of women in the labor market. The theories they explore are in turn useful in explaining spatial variations in development such as core-periphery relationships.

Topic	Learning Objective	Essential Knowledge
7.3 Measures of Development	Describe social and economic measures of development.	Measures of social and economic development include Gross Domestic Product (GDP); Gross National Product (GNP); and Gross National Income (GNI) per capita; sectoral structure of an economy, both formal and informal; income distribution; fertility rates; infant mortality rates; access to health care; use of fossil fuels and renewable energy; and literacy rates. Measures of gender inequality, such as the Gender Inequality Index (GII), include reproductive health, indices of empowerment, and labor-market participation. The Human Development Index (HDI) is a composite measure used to show spatial variation among states in levels of development.
7.4 Women & Economic Development	Explain how and to what extent changes in economic development have contributed to gender parity.	The roles of women change as countries develop economically. Although there are more women in the workforce, they do not have equity in wages or employment opportunities. Microloans have provided opportunities for women to create small local businesses, which have improved standards of living.
7.5 Theories of Development	Explain different theories of economic and social development.	Different theories, such as Rostow's Stages of Economic Growth, Wallerstein's World System Theory help explain spatial variations in development.

Important Dates/Reminders

Chapter 10: Development Unit 1.5 Development	Name: _____ Class: _____ Period: _____ Date: _____
Questions/Main Ideas:	Notes/Answers:
Field Note (pg. 288 & 289)	
What was Timbuktu like in the 13th - 16th centuries? What happened to the city?	
How do segments of the commodity chain differ in core and periphery countries?	

Key Q #1: How is development defined and measured? (pg. 289 - 296)	
Compare formal and informal economies. (include similarities and differences)	
What are some of the limitations to using GNI per capita as a development indicator?	
How can technology be used as a development indicator?	

Describe Wallerstein's World-Systems Theory.	
What are some fundamental differences between the Modernization and World-Systems Theories?	

Key Q #3: What are the barriers to and the costs of development? (pg. 298 - 304)	
How can various social conditions prevent development? Provide two examples from the textbook to support your answer.	
How can foreign debt prevent development? Provide two examples from the textbook to support your answer.	
How can political corruption/political instability prevent development?	

Provide two examples from the textbook to support your answer.	
--	--

Key Q #4: How do political and economic institutions influence uneven development within states? (pg. 305 - 310)	
What do the authors mean by "Poverty is not confined to the periphery."?	
The distribution of wealth is affected by...	
How can policies create uneven development?	
Compare farming in Wisconsin to farming in Appalachia. What's the cause of these differences?	
What are <i>quota markets</i> ? How do they influence economic development?	

Why are capital cities a spur for development? How is this related to many countries deciding to move their capital to a different city?	
What is an <i>island of development</i>?	
Describe microcredit programs. How are microcredit programs helping women?
