

Day 13, September 19 & 20, Unit 1.5

Agenda

1. 7.3 Measures of Development Guided notes
2. GDP Analysis

Reminders

1. Spatial Concept Quiz
Corrections in Raider Time and tutorials available until Thursday, 9/21.
2. Ch. 1 Reading Quiz: Retakes in Raider Time and tutorials from 9/18-9/22; bring Ch. 1 and any Ch.1 notes you may have
3. Unit 1 Exam Retakes:
Tuesday 9/26 (7:45 a.m. or 4:25 p.m.)

Retakes for Exam

Please check home access next week to review your exam score. If you did not pass, you can retake the exam on **Tuesday, 9/26** in before or after school tutorials.

Tutorials

7:45-8:45 (arrive no later than 7:50)

4:25-5:25 (arrive no later than 4:30)

In order to qualify for a retake, you must submit:

- Fully completed **review guide** (if you haven't already) and
- Complete all Unit 1 AP Daily Videos in AP Classroom

Day 12, September 19 & 20

Warm UP

Discuss with your table
mate(s) five things that you
would call
#firstworldproblems.

Objective

Describe social and economic measures of development.

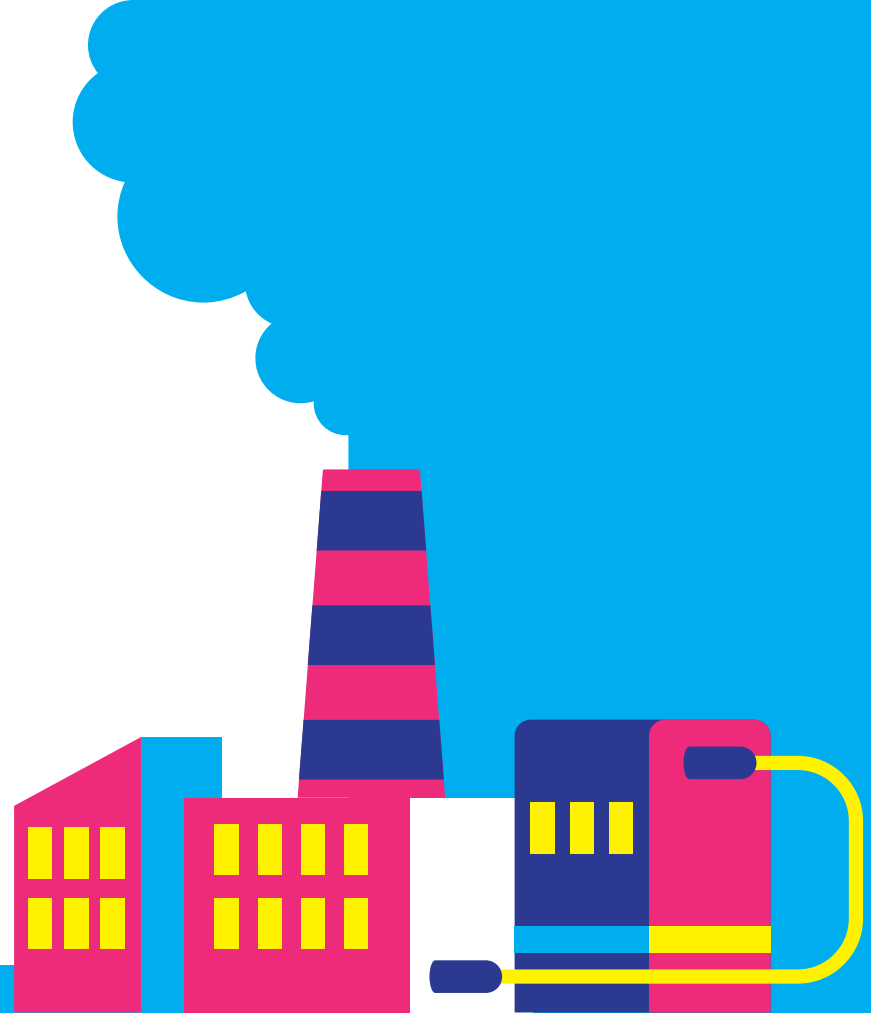

Measures of social and economic development include Gross Domestic Product (GDP); Gross National Product (GNP); and Gross National Income (GNI) per capita; sectoral structure of an economy, both formal and informal; income distribution; fertility rates; infant mortality rates; access to health care; use of fossil fuels and renewable energy; and literacy rates.

The Human Development Index (HDI) is a composite measure used to show spatial variation among states in levels of development.

Industrial Revolution

Typically, as
a country
industrializes
it also
develops (Eco & Soc)

Classifications

First World– Third World

First world = typically capitalist, Western, affluent

Second world = developing

Third world = less developed

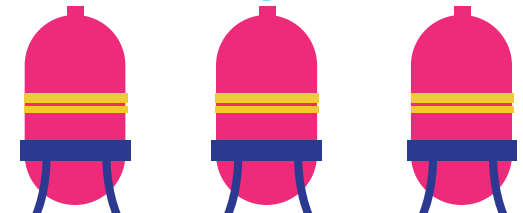

MDC–LDC

More developed = higher standard of living, better healthcare, Post-industrial

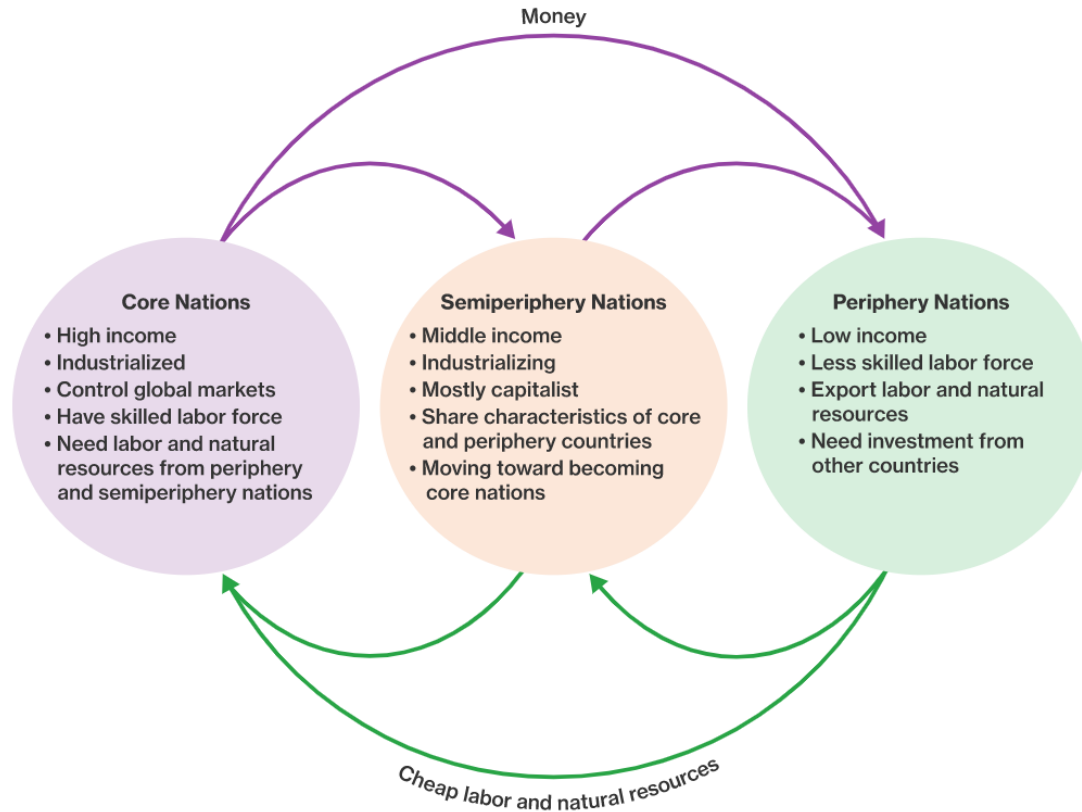

Less developed = lower standard of living, poor healthcare, more agrarian

NIC, Developing

NIC = Newly industrialized country (second world)

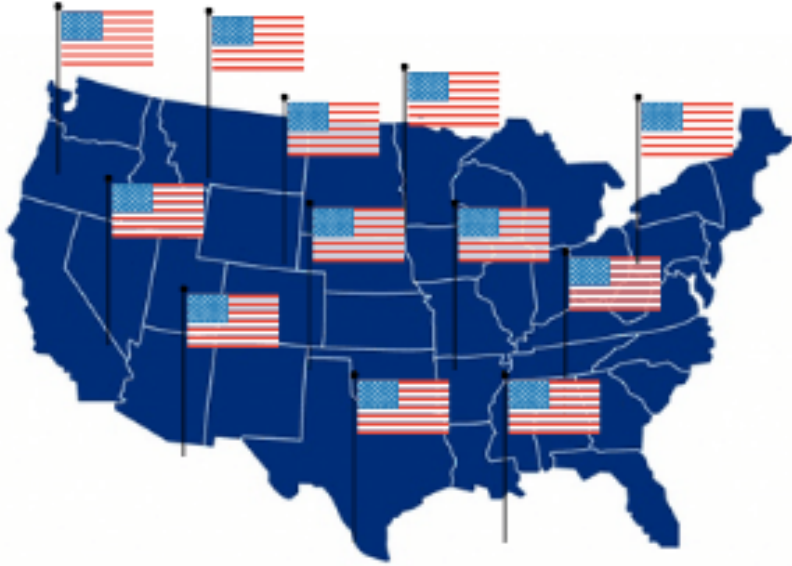

Core, Semi-Periphery, Periphery

GDP

Gross Domestic Product

Everything produced within the country

Regardless of nationality
Good indicator of health of economy

GNP

Gross National Product

Everything produced by residents of the country, including those abroad, minus the goods produced by foreign residents.

Regardless of location
Good indicator of financial well-being

GNI

Gross National
Income

the total income (profit) earned by a nation's people and businesses, including investment income, regardless of where it was earned

- Calculated using earned income rather than products (as GDP or GNP do)

High GNIs typically mean high amount of international investment and a large # of multinational corporations

Per Capita

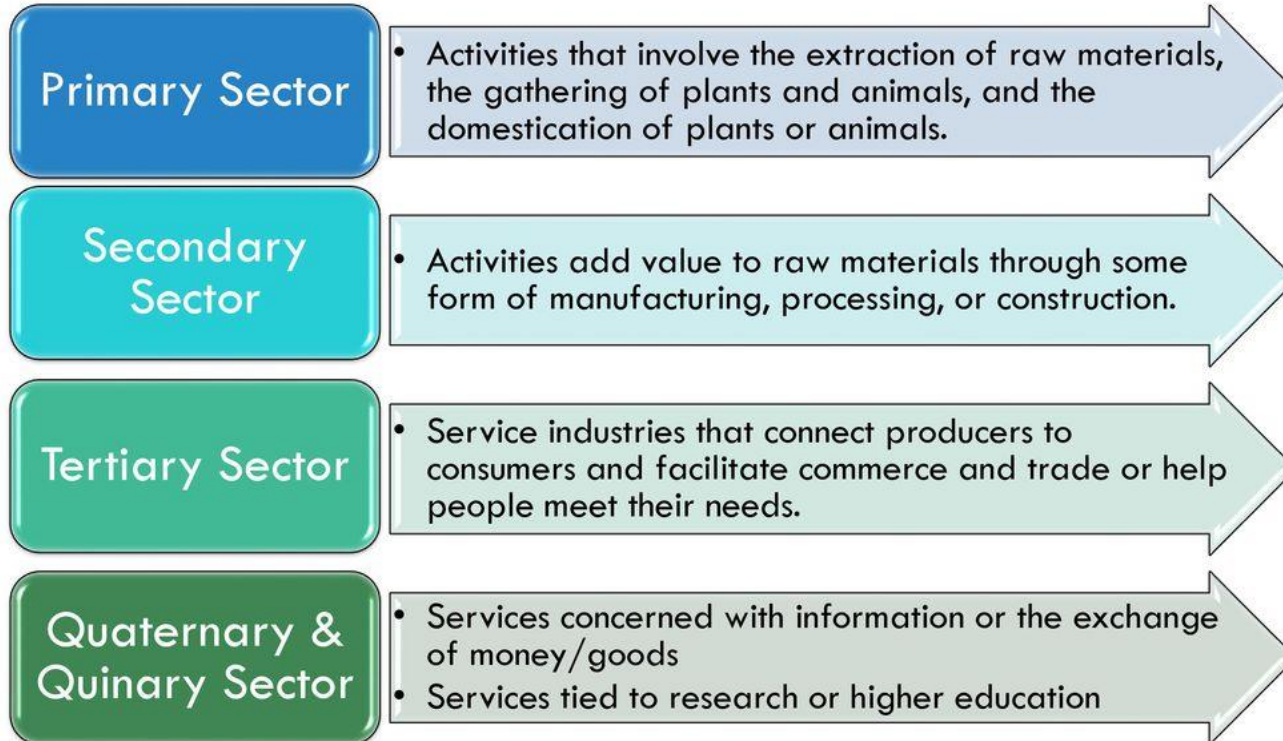

GDP, GNP, & GNI can all be converted into per capita data

Per capita = per person

divided by the total population

Per capita data can help put a country's overall well-being into perspective

ECONOMIC ACTIVITIES

Measuring Development – Economic Indicators

GDP: Gross Domestic Product

the value of the finished domestic goods and services produced within a nation's borders.

GNI: Gross National Income

the total income earned by a nation's people and businesses, including investment income, regardless of where it was earned. The number includes the nation's gross domestic product (GDP) plus the income it receives from overseas sources.

GNP: Gross National Product

is the value of all finished goods and services owned by a country's citizens, whether or not those goods are produced in that country.

Types of Work (Economic Sectors)

Primary, Secondary, Tertiary, Quaternary, Quinary

Primary: extraction of raw materials; fishing/farming

Secondary: finished goods; manufacturing

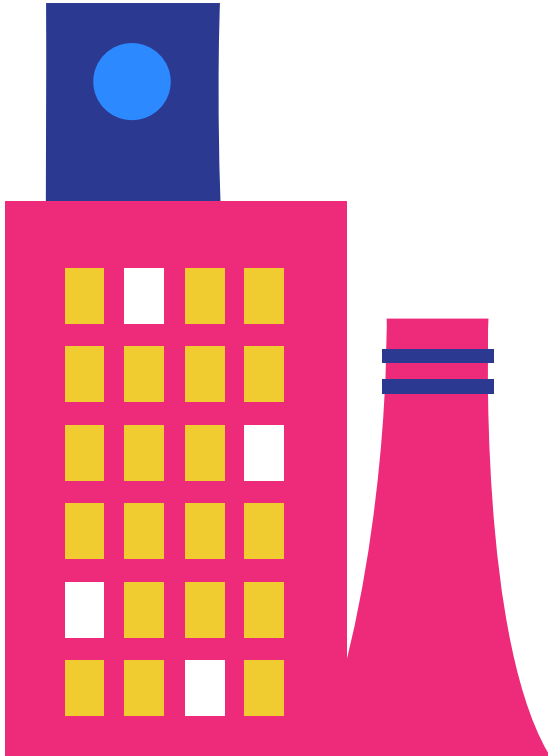

Tertiary: Services like sales/retail/transportation/teaching

Quaternary: services related to the knowledge sector; research, high education, media, IT

Quinary services associated with highly paid professionals, research scientists, and government officials; decision makers that bank

Measuring Development – Social & Cultural Indicators

Access to Education & Literacy Rates

Mean years of schooling & Expected years of schooling
Higher levels of literacy can drive development

Health & Welfare

Sanitation, access to quality health care

Cultural Factors

Status of women, religious beliefs, or cultural traditions

Measuring Development – Demographic Indicators

TFR

Average # of children a woman will give birth to
Good indicator of women's status
TFR tends to be highest in the periphery/LDCs

Total Fertility Rate

IMR

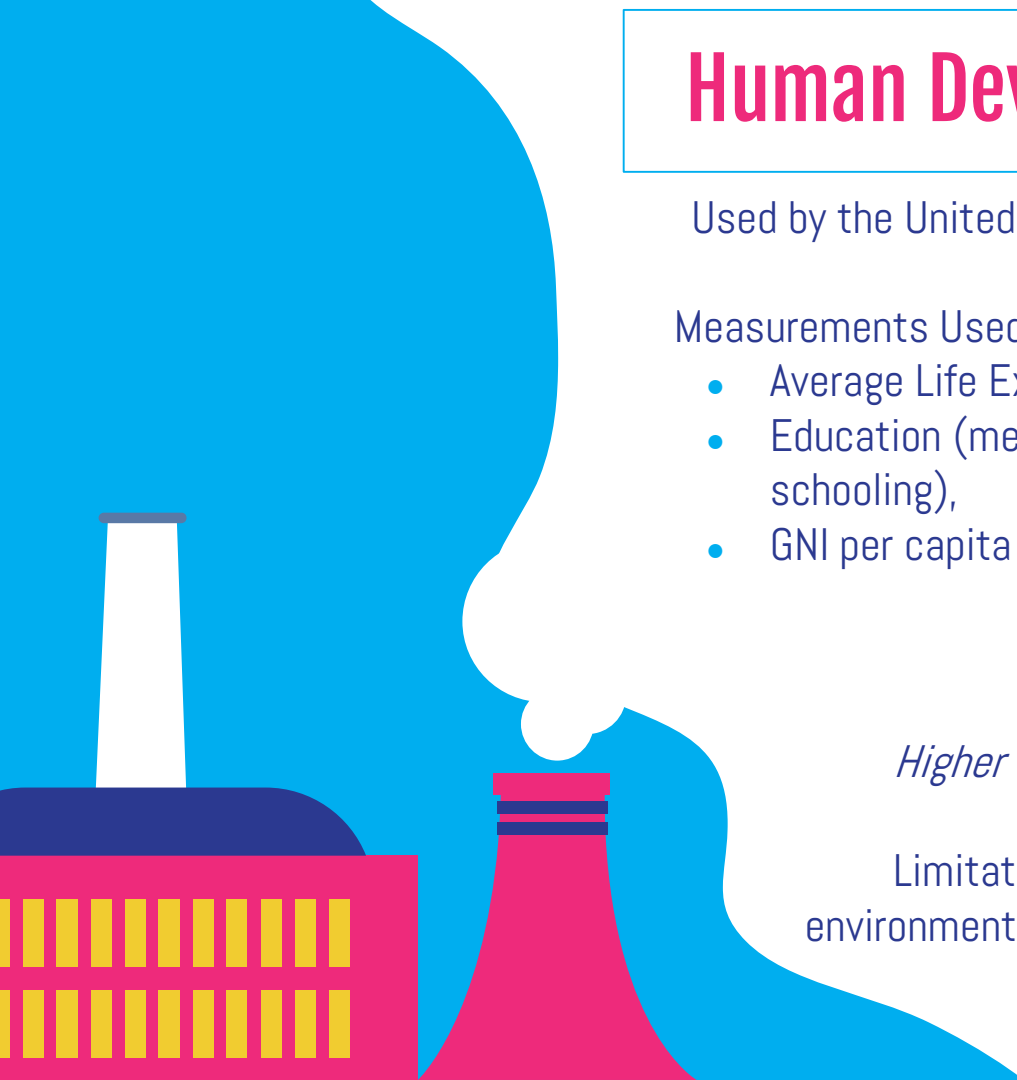

of deaths of children under the age 1 per 1,000 live births
Good indicator of health care system
IMR is highest in the periphery/LDCs

Infant Mortality Rate

LE

Average # of years a person is expected to live
Very good indicator of health care and elderly care system
LE is lower in the periphery/LDCs

Life Expectancy

Human Development Index (HDI)

Used by the United Nations to determine overall levels of development in a country

Measurements Used in Index:

- Average Life Expectancy,
- Education (mean years of schooling & expected years of schooling),
- GNI per capita (standard of living)

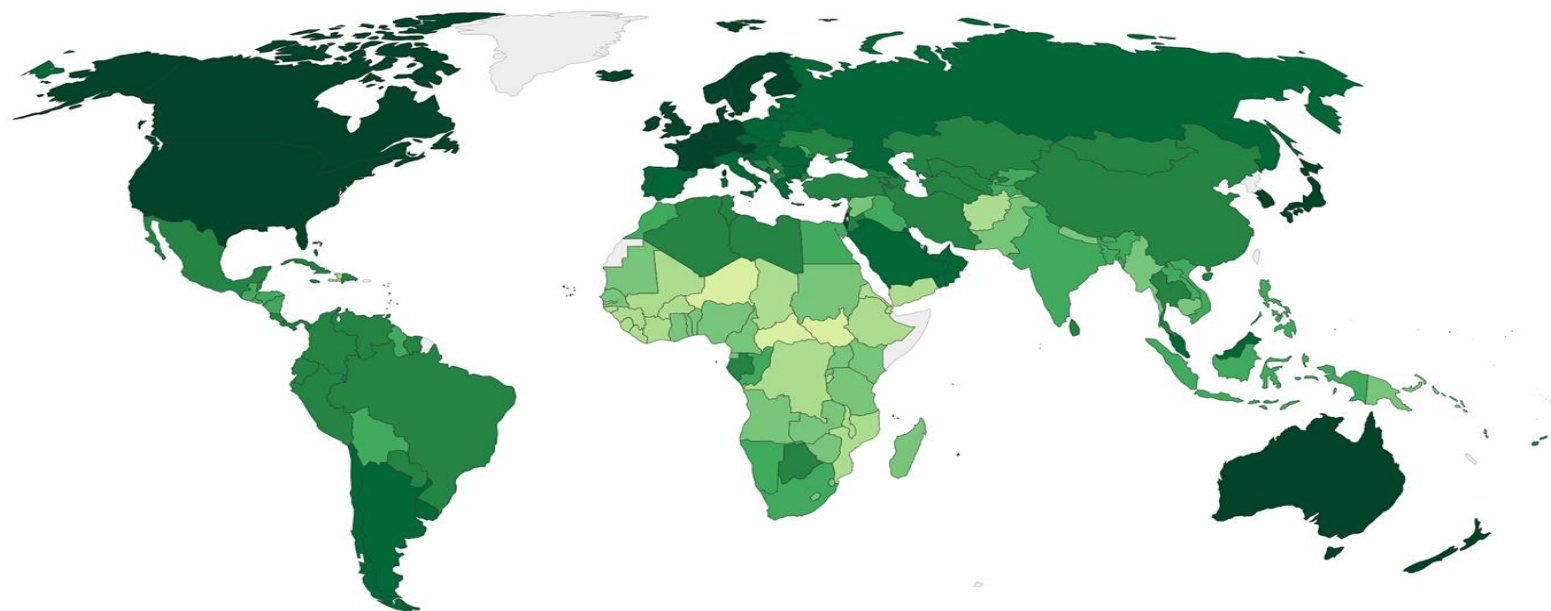

Countries are scored from 0 to 1

Higher the number: higher level of development

Limitation: Does not take into account: poverty rate, environmental issues, gender equality and social equality

Human Development Index, 2017

The Human Development Index (HDI) is a summary measure of key dimensions of human development: a long and healthy life, a good education, and having a decent standard of living.

Measures of Gender Inequality

Gender Development Index

Calculates gender disparity by looking at Life Expectancy, education, and standard of living (GNI)

Index #1=equality, further away from 1 is less equality/more disparity

**Disparity: measuring differences; in this case differences between genders*

Gender Inequality Index (GII)

Calculates inequality based on reproductive health, empowerment, and labor-market participation

Index # 0-1, closer to 0, more equal

Levels of Development

During each round you will fill in the chart with the given information. The goal is to try to match each country with the correct information.

We will go over results at the end.

URBANIZATION

ROUND 1: URBANIZATION

Use the numbers below to complete the chart.

Determine what percent of the population lives in URBAN areas?

67%

83%

83%

34%

60%

23%

87%

PRIMARY ACTIVITIES

ROUND 2: PRIMARY LEVEL

Based on your prior social studies knowledge and prior geography lessons, complete the chart to the BEST of your abilities.

Use the numbers below to complete the chart.
Determine what percent of the population is engaged in AGRICULTURE as an economic activity?

9%

76%

25%

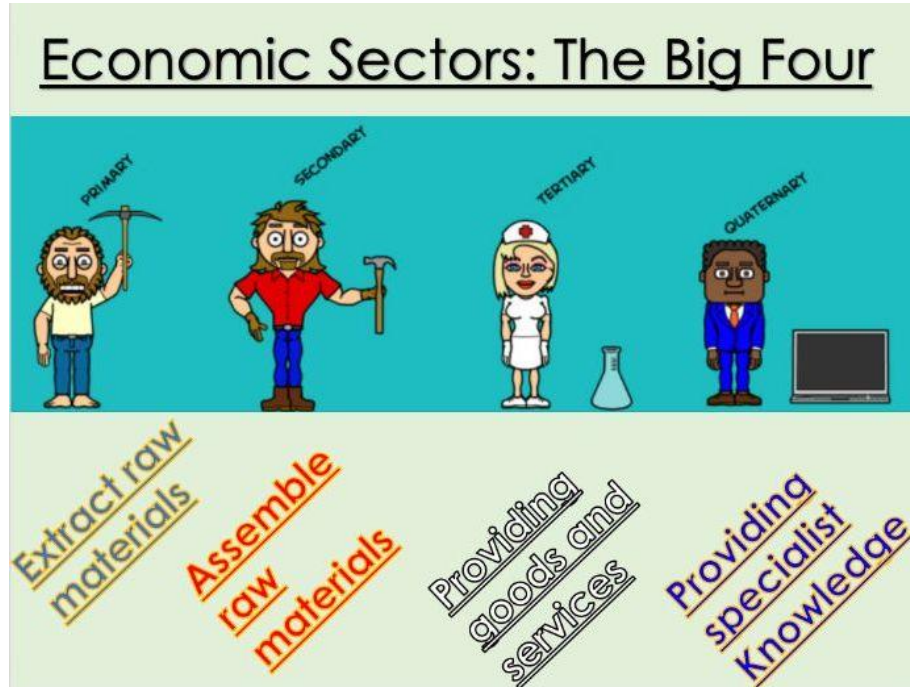

42%

2%

1%

5%

SECONDARY & TERTIARY ACTIVITIES

ROUND 3: SECONDARY/TERTIARY LEVEL

Use the numbers below to complete the chart.

Determine what percent of the population is engaged in MANUFACTURING & SERVICES as an economic activity?

71%

21%

32%

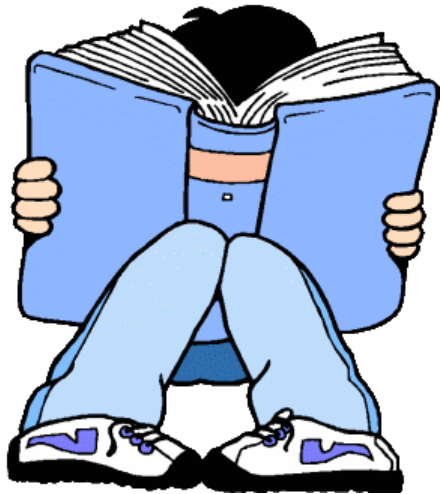

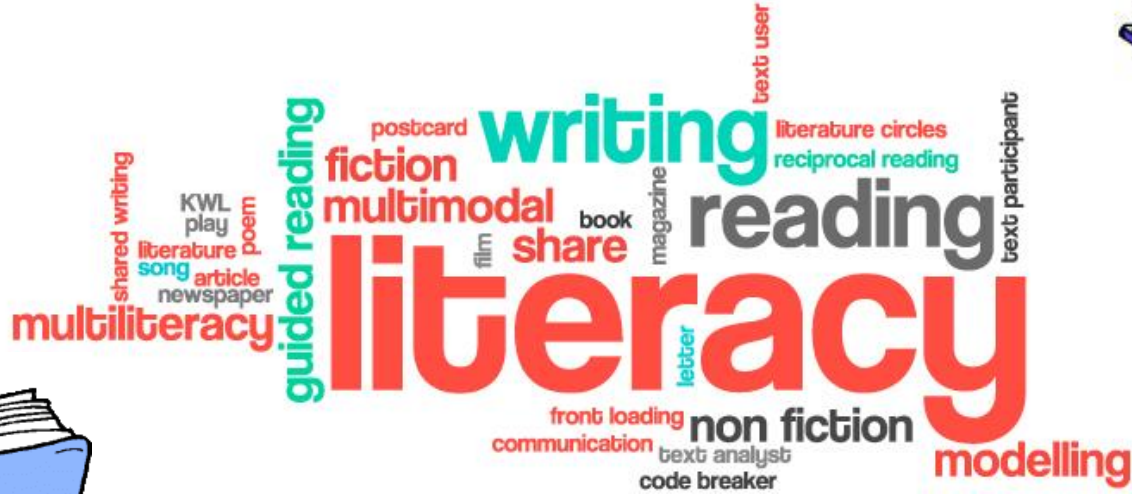

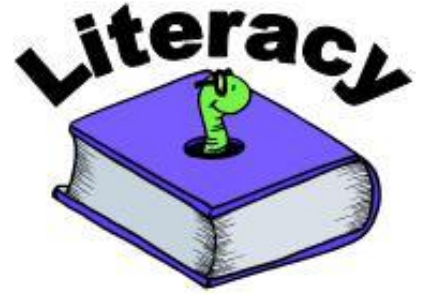

46%

72%

79%

79%

LITERACY RATES

ROUND 4: LITERACY

Use the numbers below to complete the chart.

Determine what percent of the population is LITERATE?

100%

99%

97%

93%

87%

74%

22%

HUMAN DEVELOPMENT INDEX

What is HDI?

Life
Expectancy
at Birth

Average
Education
Levels

+

Adult Literacy
Rates

Standard of
Living
(GNI/capita
PPP)

ROUND 5: HDI

Use the numbers below to complete the chart.

Determine the Human Development Index (HDI) score for each country. Hint closer to 1 the more developed

.957

.926

.765

.761

.709

.645

.398

GROSS NATIONAL INCOME PER CAPITA

ROUND 6: GNI PER CAPITA

Use the numbers below to complete the chart.

Determine the Gross National Income per capita score for each country.

\$14,200

\$1,500

\$16,000

\$66,500

\$6,600

\$12,100

\$63,800

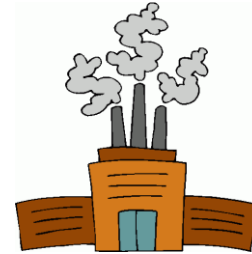

ROUND 7: LEVELS OF DEVELOPMENT

Determine which countries are:

1) Periphery (LDC))

1) Semi-Periphery (NIC)

1) Core (MDC)

Place info by country name

ROUND 8: LEVELS OF
DEVELOPMENT
NOW RANK THE
COUNTRIES:

#1 being the MOST DEVELOPED and #7 being the
LEAST DEVELOPED

	Urban	1	2/3	Literacy	HDI	GNI per capita	World Rank
U.S.A	83%	1%	72%	99%	.926	\$62,530	17 (2)
Norway	83%	2%	79%	100%	.957	\$66,500	1 (1)
Brazil	87%	9%	71%	93%	.765	\$14,200	84 (3)
S.Africa	67%	5%	72%	87%	.709	\$12,100	114(5)
Chad	23%	76%	21%	22%	.398	\$1,500	187 (7)
India	34%	42%	32%	74%	.645	\$6,600	131 (6)
China	60%	25%	46%	97%	.761	\$16,000	85 (4)

GDP Analysis

See Map and GDP Analysis Worksheet in Day 13 folder
