

Name: _____

Period: _____

Gender Development Index (GDI) & Gender Inequality Index (GII)

Research Project: Due: _____

The **Gender Development Index** is a composite metric that separates the Human Development Index by gender (males & females) using the following three dimensions:

- Standard of living (measured by Gross National Income/GNI per capita)
- Education (average # of expected and mean years of schooling)
- Life Expectancy (average # of years one is expected to live)

The closer to 1 a country's GDI is, the more "equal" the [binary] genders are in that country.

The **Gender Inequality Index** is also a composite metric but it measures Gender Inequality using different dimensions than GDI. The dimensions are

- Reproductive health (measured by maternal mortality & adolescent birth ratios)
- Empowerment (share/percent of seats in parliament/congress & percent of male/female population with at least some secondary education/high school)
- Labor Market Participation (participation rate of males and females age 15 and older who are employed)

It ranges from 0, where women and men fare equally, to 1, where one gender fares as poorly as possible in all measured dimensions.

Your 1st Task: Research GDI

Find the above information for the country using the [Gender Development Index](#) and fill out the chart below.

READ ME/VERY IMPORTANT: When finding your country's GDI on the interactive line graph, select "add a country" to find your assigned country and highlight it on the line graph. If the graph is too busy, you can also refine it by selecting a region to decrease the amount of data/lines on your graph. Then, be sure to move your cursor to the FAR right end to capture 2021 data. ***BEWARE:*** Double check your country name and year for 2021 so you get the correct data. Too many students lose points when they are not careful about this! Details make the difference!!

Country: _____		
2021 GDI: _____		
	Females	Males
HDI		
Expected years of schooling		
Mean years of schooling		
GNI per capita		
Life expectancy		

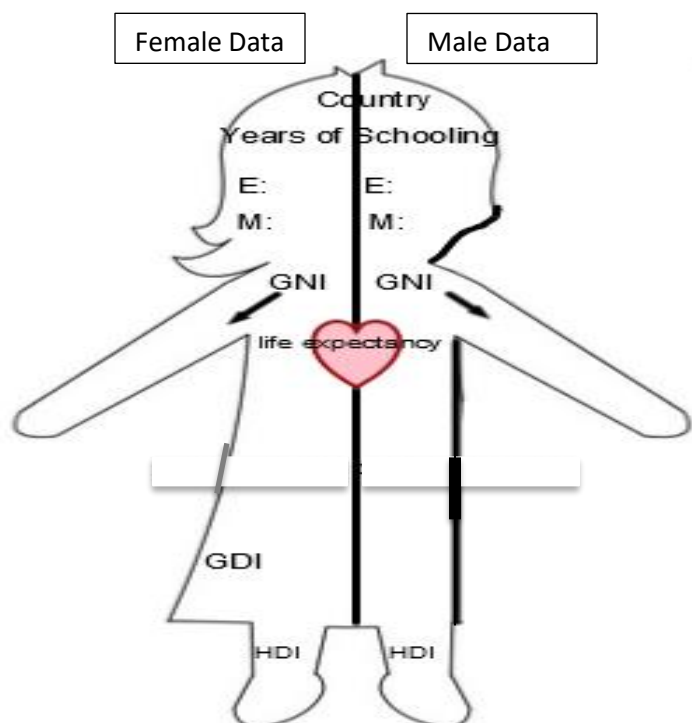

Name: _____

Period: _____

Your 2nd Task: GDI Gender Doll Work

You will add the GDI information to the front of your Gender Doll. Be sure to follow example below for location of data on doll and as a comparative reference. Be sure to label and write your data legibly. You will also want to decorate/color your doll in keeping with the country assigned. (For example: Using the country's flag colors.) When finished, cut out your doll and put your name on the back foot. Details make the Difference.

Country: United States		
2021 GDI: 1.001		
	Females	Males
HDI (2019)	.920	.919
Life Expectancy	80.2	74.3
Expected years of schooling (E)	16.9	15.6
Mean years of schooling (M)	13.7	13.6
GNI per capita	\$51,539	\$78,238

Name: _____

Period: _____

Your 3rd Task: Research GIIUsing the [Gender Inequality Index](#) fill out the chart below for your assigned country.

READ ME/VERY IMPORTANT: When finding your country's GII on the interactive line graph, select "add a country" to find your assigned country and highlight it on the line graph. If the graph is too busy, you can also refine it by selecting a region to decrease the amount of data/lines on your graph. Then, be sure to move your cursor to the FAR right end to capture 2021 data. **BEWARE:** Double check your country name and year for 2021 so you get the correct data. Too many students lose points when they are not careful about this! Details make the difference!!

Country: _____		
2021 GII: _____		
	Females	Males
Maternal Mortality Ratio		N/A
Adolescent Birth Rate		N/A
Share/Percent of Seats in Parliament (Congress)		
Percent of Population with at least some secondary ED		
Labor Force Participation Rate		

UNITED STATES EXAMPLE (For Comparative Reference)		
2021 GII: .179		
	Females	Males
Maternal Mortality Ratio	19 deaths/100,000 live births	N/A
Adolescent Birth Rate	16/1000 (ages 15-19)	N/A
Share/Percent of Seats in Parliament (Congress)	27%	73%
Percent of Population with at least some secondary ED	96.5%	96.4%
Labor Force Participation Rate	55.2%	66.4%

Name: _____

Period: _____

Your 4th Task: Answer the following questions below in complete sentences. At least 2 sentences are required for each response.

1. How does your country's **GDI** data compare to the United States' GDI data? *(be sure to address at least one similarity or one difference)* Why do you think this difference or similarity may exist?

2. How does your country's **GII** data compare to the United States' GII data? *(be sure to address at least one similarity or one difference)* Why do you think this difference or similarity may exist?

3. Which composite metric, GDI or GII do you think gives you a better understanding of the status of women within a country? Be sure to explain your response with sound reasoning and specific references to measures used to calculate GDI and GII.

4. Of all the dimensions that you have researched in both composite metrics for your country along with the data you reviewed for the United States, what surprised you most and why?

Detach this page and staple it to the back of your Gender Doll.
Place staple at very top of doll's head.
