

Name: _____

Period: _____

Unit 2 Exam Review: Population & Migration

*** Optional Review. Complete at 100% for extra credit. ALL or NOTHING***
Due BEFORE the exam begins

Topic 2.1 - Population Distribution

Objective: Identify the factors that influence the distribution of human populations at different scales, define methods geographers use to calculate population density and explain the differences between and the impacts of methods used to calculate population density.

What is the difference between "Arithmetic Density" and "Physiological Density"?

What is "Agricultural Density"?

Explain the PHYSICAL and HUMAN factors that influence the distribution of population.

Describe how population patterns can vary according to the scale of analysis (use examples).

Topic 2.2 Consequences of Population Distribution

Objective: Explain how population distribution and density affect society and the environment.

Define and Explain Carrying capacity.

Name 2 problems we may face in the future regarding overpopulation.

Topic 2.3 Population Composition

Objective: Describe elements of population composition used by geographers and explain ways that geographers depict and analyze population composition.

Describe the characteristics and give examples of the following types of population pyramids

- ❖ Stage 1/2 (Triangle shaped)

- ❖ Stage 3 (Hershey Kiss shaped)

- ❖ Stage 4 (Box shaped)

- ❖ Stage 5 (Cup shaped)

What do population pyramids help us see as geographers? (what does it show us/why are they important?)

Topic 2.4 Population Dynamics

Objective: Explain Factors that account for contemporary and historical trends in population growth and decline.

Define the following terms:

- ❖ Fertility Rate

- ❖ Rate of Natural Increase

- ❖ Doubling time

❖ Infant Mortality rate

Explain how CESP factors can affect population growth OR decline.

Topic 2.5 The Demographic Transition Model

Objective: Explain theories of population growth and decline

Explain the Demographic Transition model and why it's important.

Describe each stage of the DTM: (include example countries, population pyramid shape, development of country etc)

❖ Stage 1:

❖ Stage 2:

❖ Stage 3:

❖ Stage 4:

❖ Stage 5:

What is the Epidemiological transition model? How does it explain changing death rates?

Topic 2.6 Malthusian Theory

Objective: Explain theories of population growth and decline

What did Thomas Malthus predict in 1798?

What solutions did Malthus suggest to correct overpopulation? (these were his "Checks" on population)

Name 2 criticisms of Malthus' theory.

Define the following terms that are related to Malthus' theory:

- ❖ Arithmetic/Linear Growth
- ❖ Exponential/Geometric Growth

Topic 2.7 Population Policies

Objective: Explain the intent and effects of various population and immigration policies on population size and composition.

Describe what a pronatalist policy is and explain the effects of this policy on the country.

Describe what an antinatalist policy is and explain the effects of this policy on the country.

What are some HELPFUL strategies for reducing population growth rates?

Topic 2.8 Women & Demographic Change

Objective: Explain how the changing role of females has demographic consequences in different parts of the world.

What are some ways the role of females are changing in various countries?

How does this change in roles affect the demographic composition of a country?

Topic 2.9 Aging Populations

Objective: Explain the causes and consequences of an aging population

Define the dependency ratio.

Why should you worry about the dependency ratio? (Think: What does this mean for a country?)

List some of the CESP effects of an aging population.

What are some of the causes of an aging population?

Topic 2.10 Causes of Migration

Objective: Explain how different causal factors encourage migration.

Define Cyclic and Periodic Movement

Define Migration. How is it different than Cyclic and Periodic Movements?

Compare Push and Pull Factors and include examples of each.

List the Rules of Ravenstein's Laws of Migration

How does the Gravity Model relate to Ravenstein's Rules of Migration?

How does Distance Decay impact migration?

Topic 2.11 Forced and Voluntary Migration

Objective: Describe types of forced and voluntary migration.

List and Describe Types of Voluntary Migration.

List and Define Types of Forced Migration

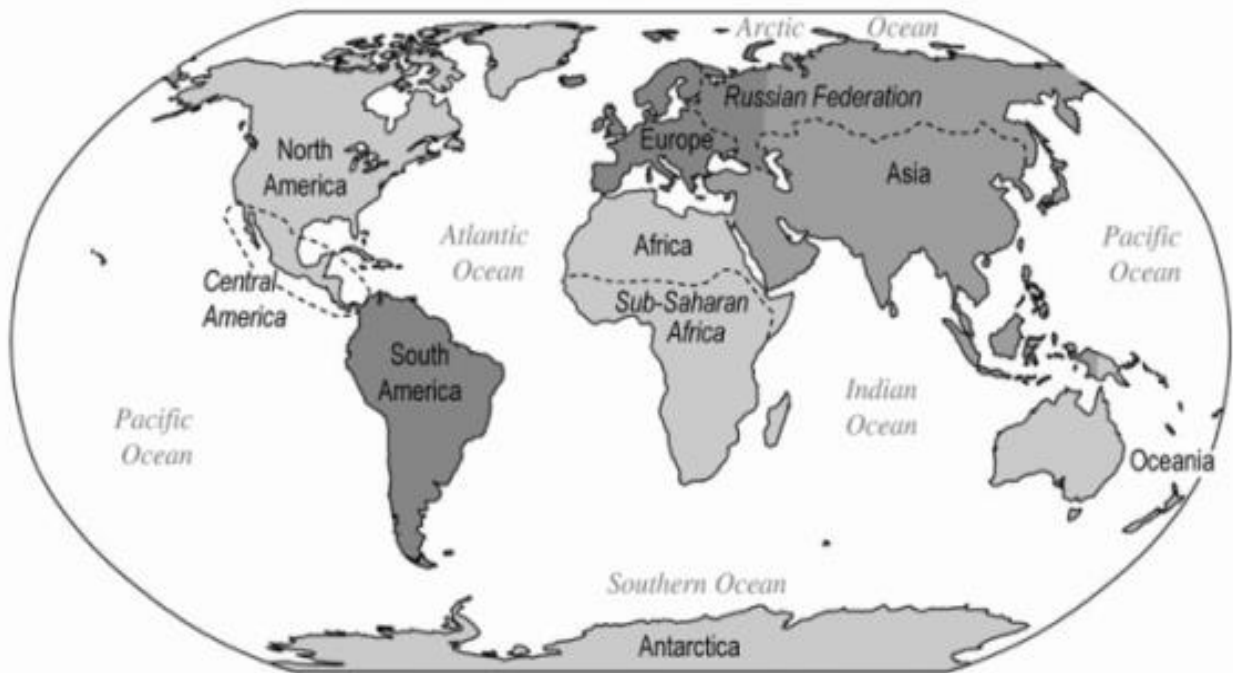

Topic 2.12 Effects of Migration

Objective: Explain historical and contemporary geographic effects of migration.

List Effects of Migrations (include cultural, social, political and economic effects)
