

2.10 Causes of Migration Guided Notes

What is migration?

What causes someone to migrate?

What would be your top five reasons for migrating to a new area?

Types of Movement

Cyclic:

Periodic:

**the action or practice of moving livestock from one grazing ground to another in a seasonal cycle, typically to lowlands in winter and highlands in summer.*

Actual Migration

Immigration vs. Emigration

Push factors vs. Pull Factors

Migration Factors

Political Issues:

Economic Issues:

Environmental Issues:

Cultural & Social Issues:

Transportation Issues:

Ravenstein's Laws:

Ravenstein's Laws		Most Migration done in Steps/Series of stages
Every migration flow generates a return or counter-migration.	The majority of migrants move a short distance.	Migrants who move longer distances tend to choose big-city destinations.
People in rural areas migrate MORE than people in cities.	Families are less likely to move than young adults.	Males migrate over longer distances than females. Most migrants are young males.
Most migration occurs because of economic issues.	Most migration occurs because of economic issues.	Cities grow more by migration than natural increase.

Gravity Model & Migration

Limitations of Gravity Model/Distance Decay Influence on Migration

2.11 Forced & Voluntary Migration

Guided Notes
