

Day 25, Unit 2, October 26 & 27

Agenda:

- 1. 2.9 Aging Populations**
- 2. FRQ Practice**

Reminders:

**Chapters 2 & 3 Reading
Quiz & Guides Due:
Friday, 11/3 (A) &
Monday, 11/6 (B)**

2.9 Aging Populations

Explain the causes and consequences of an aging population.

The total dependency ratio is calculated as:

$$(((\text{Population ages 0-15}] + [\text{Population ages 65-plus}]) \div [\text{Population ages 16-64}]) \times 100$$

The old-age dependency ratio is calculated as:

$$([\text{Population ages 65-plus}] \div [\text{Population ages 16-64}]) \times 100$$

The formula for the youth dependency ratio is:

$$([\text{Population ages 0-15}] \div [\text{Population ages 16-64}]) \times 100$$

“

- ▶ *Do you remember the dependency ratio? It is the number of people in a dependent age group (under age 16 or older than 64) divided by the economically active (between ages 16 and 64).*
- ▶ *In many countries, particularly developed/core countries, the dependency ratio is increasing due to the number of elderly people (old age dep.).*
- ▶ *Countries with aging populations generally have lower TFRs (below 2.1), higher life expectancies, and are in stage 4/5 of the DTM.*

Social Effects of an Aging Population

◀ Negatives

- ◀ Fewer young people are available to care for aging parents at home
- ◀ Strain on middle aged people: caring for children while also caring for elder family members

◀ Positives

- ◀ Retired grandparents able to care for grandchildren
 - ◀ Maintaining family networks, multigenerational families
- 

Economic Effects of an Aging Population

Negatives

- ▶ Retirees pay less in taxes; $\Rightarrow$ less govt. revenue
- ▶ Government Retirement programs offered by are expensive \$\$
 - ▶ As the cost of these programs increase, tax rates on working people increase
- ▶ Retirees running out of \$\$ as they live longer than their retirement savings can provide
- ▶ Cost of long-term elder care and medical expenses are increasing and causes financial strain
- ▶ Loss of workers who are caregivers: Adult children taking care of elderly parent - may have to take a less demanding job or leave the workforce altogether
- ▶ Economic productivity & growth decrease with less workers

Economic Effects of an Aging Population

◀ Positives

- ◀ Elder care industry is booming - companies that specialize in this care are making huge profits
- ◀ Elderly are less likely to commit crimes and are not in school → major expenditures of governments
- ◀ Elders available to do Volunteer work

Political Effects of an Aging Population

- ▶ Shape the political landscape → old people VOTE → “elderly issues” dominate (Social Security, health care) whereas other issues may not be prioritized (environment, education)
- ▶ Raising the retirement age? Trend of elders working beyond 64; controversial in many countries
- ▶ Encouraging immigration → met with positivity in some countries and negativity in others

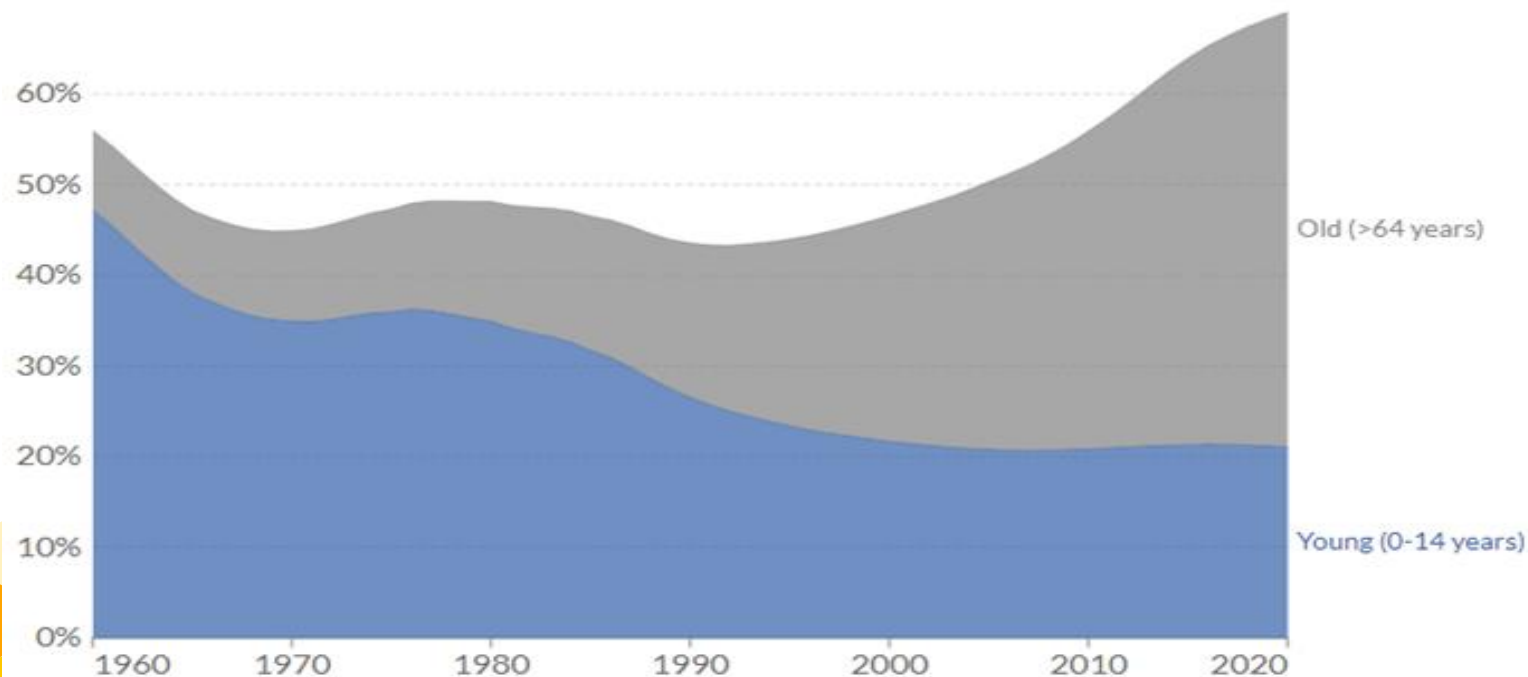

Japan is Changing How We'll Grow Old

Age dependency breakdown by young and old dependents, Japan, 1960 to 2020

Age dependency ratio is the ratio of dependents (either children aged 0-14 years, or older populations aged over 64 years) to the working age population (15-64 years). Data shows the relative composition of the dependent population between young and old.

Japan needs foreign workers, but will they come?

Today, nearly 3 million migrants live in Japan out of a population of 126 million. That number is triple the figure in 1990. And as Japan struggles with a rapidly aging population and shrinking domestic workforce, it's looking to increase that number further. In April 2019, Tokyo implemented historic immigration reform, expanding visa programs to allow more than 345,000 new workers to immigrate to Japan over the subsequent five years. Low-skilled workers will be able to reside in Japan for five years, while foreign workers with specialized skills will be allowed to stay indefinitely, along with their family members—suggesting that many of these workers might stay for good. <https://foreignpolicy.com/2020/06/23/japan-immigration-policy-xenophobia-migration/> (June, 2020)

Separately, Kishida's Cabinet on Friday approved a plan to expand the scope of job categories allowed for foreign workers, opening the door for their future permanent residency, in a major shift in a country known for a closed-door immigration policy that is struggling with a rapidly aging and declining population.

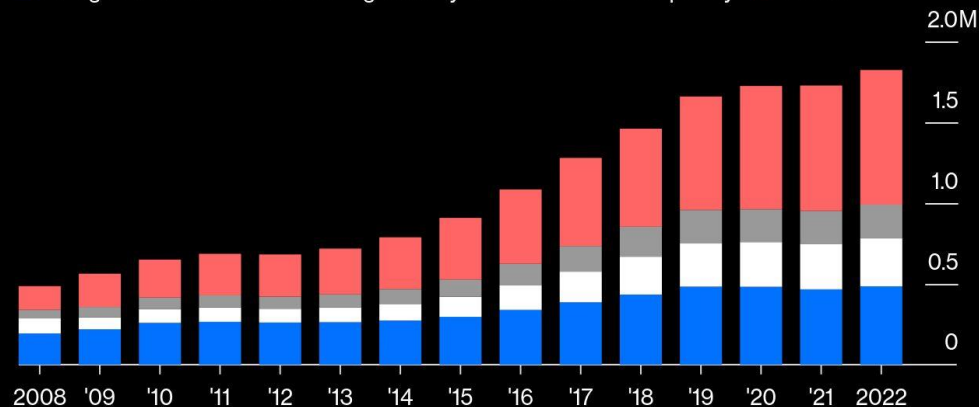

The plan will allow foreign workers in nine additional industries, including fisheries, agriculture and hotels. Those who hold visas allowing them to stay in Japan for five years or less can upgrade to a longer visa that permits them to bring their families to Japan if they pass language and technical skills exams. At the end of March, about 150,000 foreign workers held the more restrictive visa, according to the immigration agency.

Free Response Questions

- 1) Write in complete sentences. If it is not, College Board will not award points.
- 2) Label each part of the FRQ Responses. (A., B., C., D.,) - you must be clear which response responses goes with each prompt. Start each response on a new line. You do not need to skip lines.
- 3) Pay close attention to task verb as response will need to align.
- 4) Use part of prompt in first sentence of response.
- 5) Be as specific as possible. Incorporate AP Human Vocabulary whenever relevant.
- 6) Some FRQs will have a stimulus or two while others will have no stimulus.
- 7) On the National Exam, you will have 75 minutes to complete three FRQs. Each FRQ will have seven parts. It is worth half of your overall score.

The following **task verbs** are commonly used in the free-response questions:

Compare: Provide a description or explanation of similarities and/or differences.

Define: Provide a specific meaning for a word or concept.

Describe: Provide the relevant characteristics of a specified topic.

Explain: Provide information about how or why a relationship, process, pattern, position, or outcome occurs, using evidence and/or reasoning.

Identify: Indicate or provide information about a specified topic, without elaboration or explanation.
