

Day 22, Unit 2, October 18 & 19

1. Finish 2.6 notes (if applicable)
2. 2.7 & 2.8 Notes (Pop. Policies & Role of Women)
3. Population Policy Research

Reminder: Bring Art supplies next class (markers, map colors, crayons)

Objective

2.7 Explain the intent and effects of various population policies on population size and composition.

2.8 Explain how the changing role of females has demographic consequences in different parts of the world.

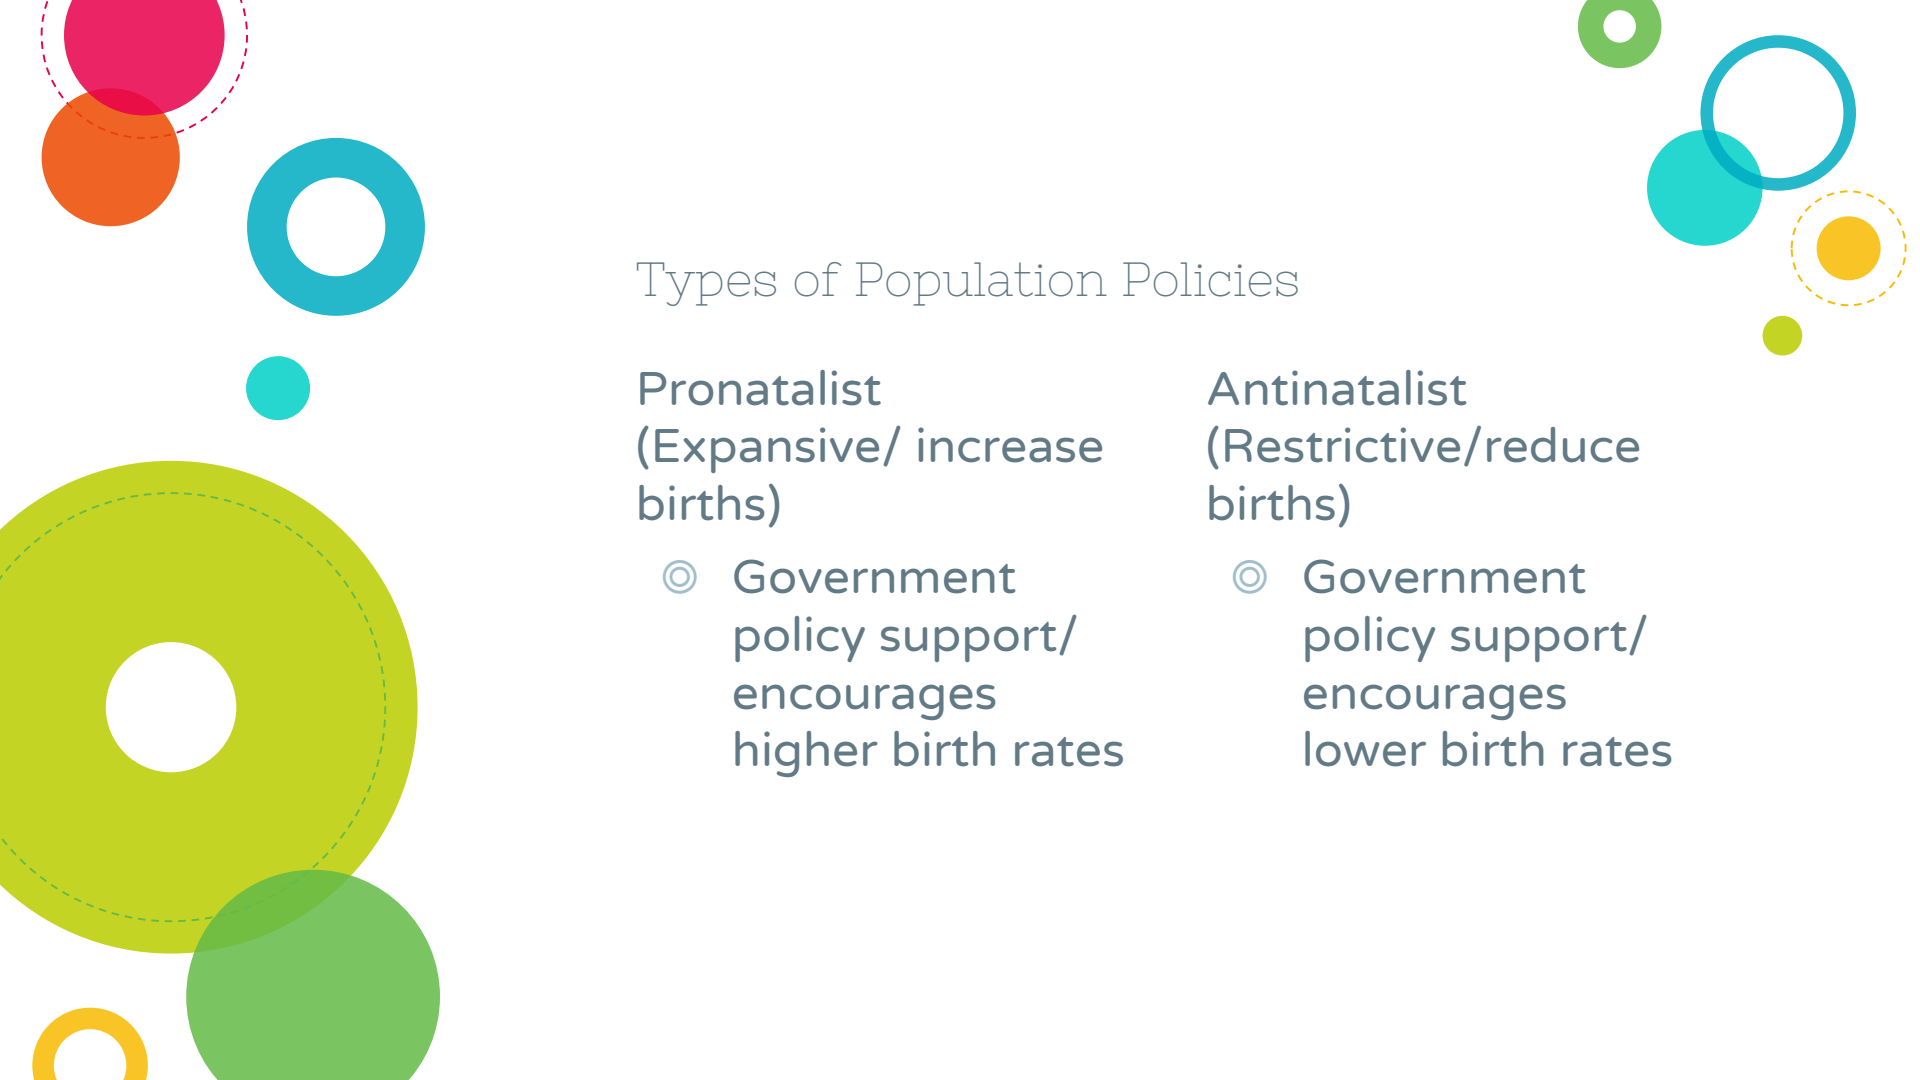

A decorative graphic featuring a large, light blue dashed circle that frames the central text. Various solid-colored circles in teal, lime green, orange, and pink are scattered around the perimeter. Some circles are solid, while others are dashed outlines. A large teal ring is in the top left, and a large yellow ring is in the bottom right.

2.7 Population Policies

TOPIC 2.7

Population Policies

Types of Population Policies

Pronatalist
(Expansive/ increase births)

- ◎ Government policy support/ encourages higher birth rates

Antinatalist
(Restrictive/ reduce births)

- ◎ Government policy support/ encourages lower birth rates

Pro Natalist

The country may have an aging, declining population and as a result, shortage of economically active individuals.

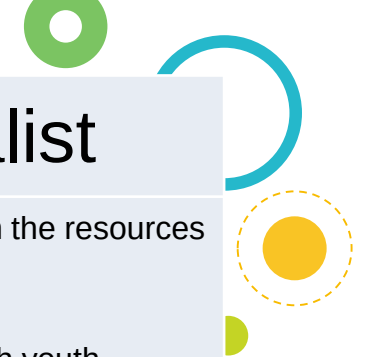

It often has a high old age dependency ratio.

What do they do?

Public relations
campaigns/propaganda/advertising

Some governments offer incentives.

Incentives can include money, extended maternity or paternity leave, free or subsidized child care, free or subsidized education

Anti Natalist

The population is greater than the resources they have to support it.

It has a young population/ high youth dependency ratio.

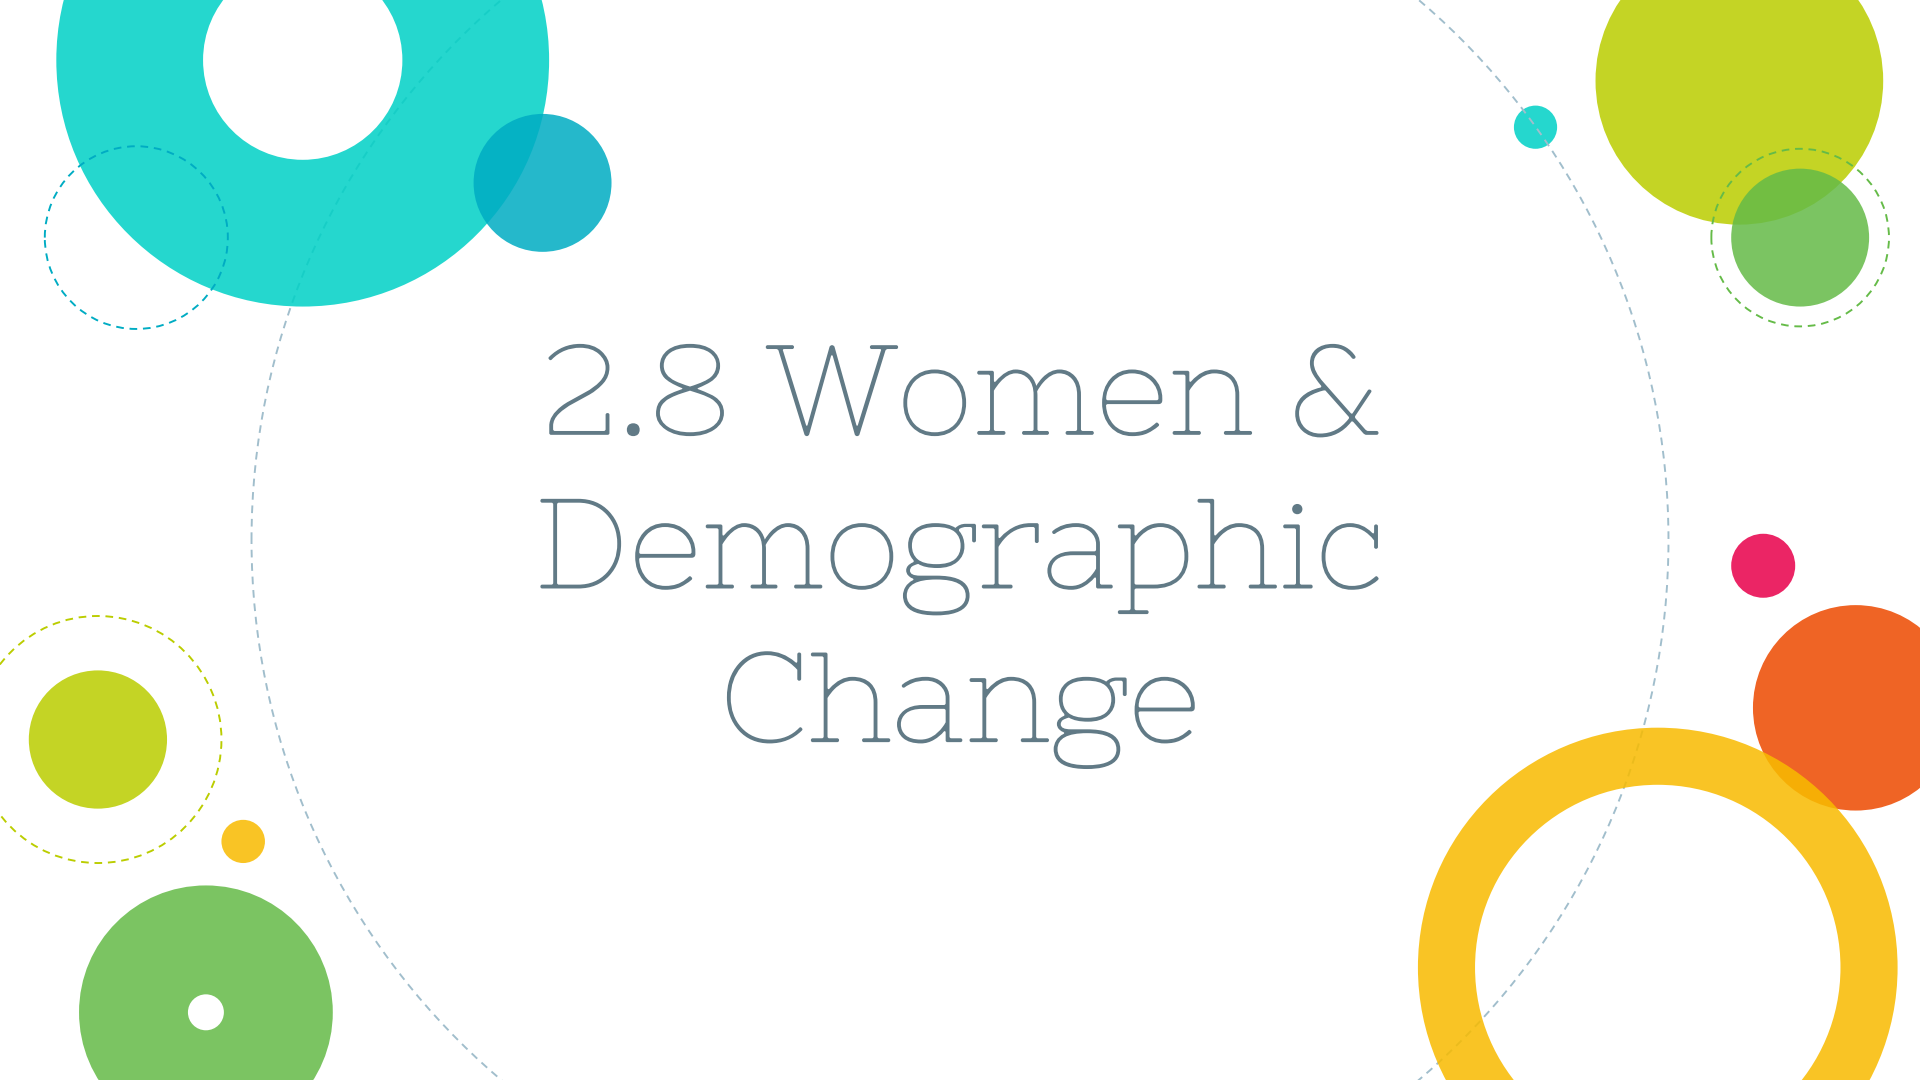

What do they do?

Public relations
campaigns/propaganda/advertising

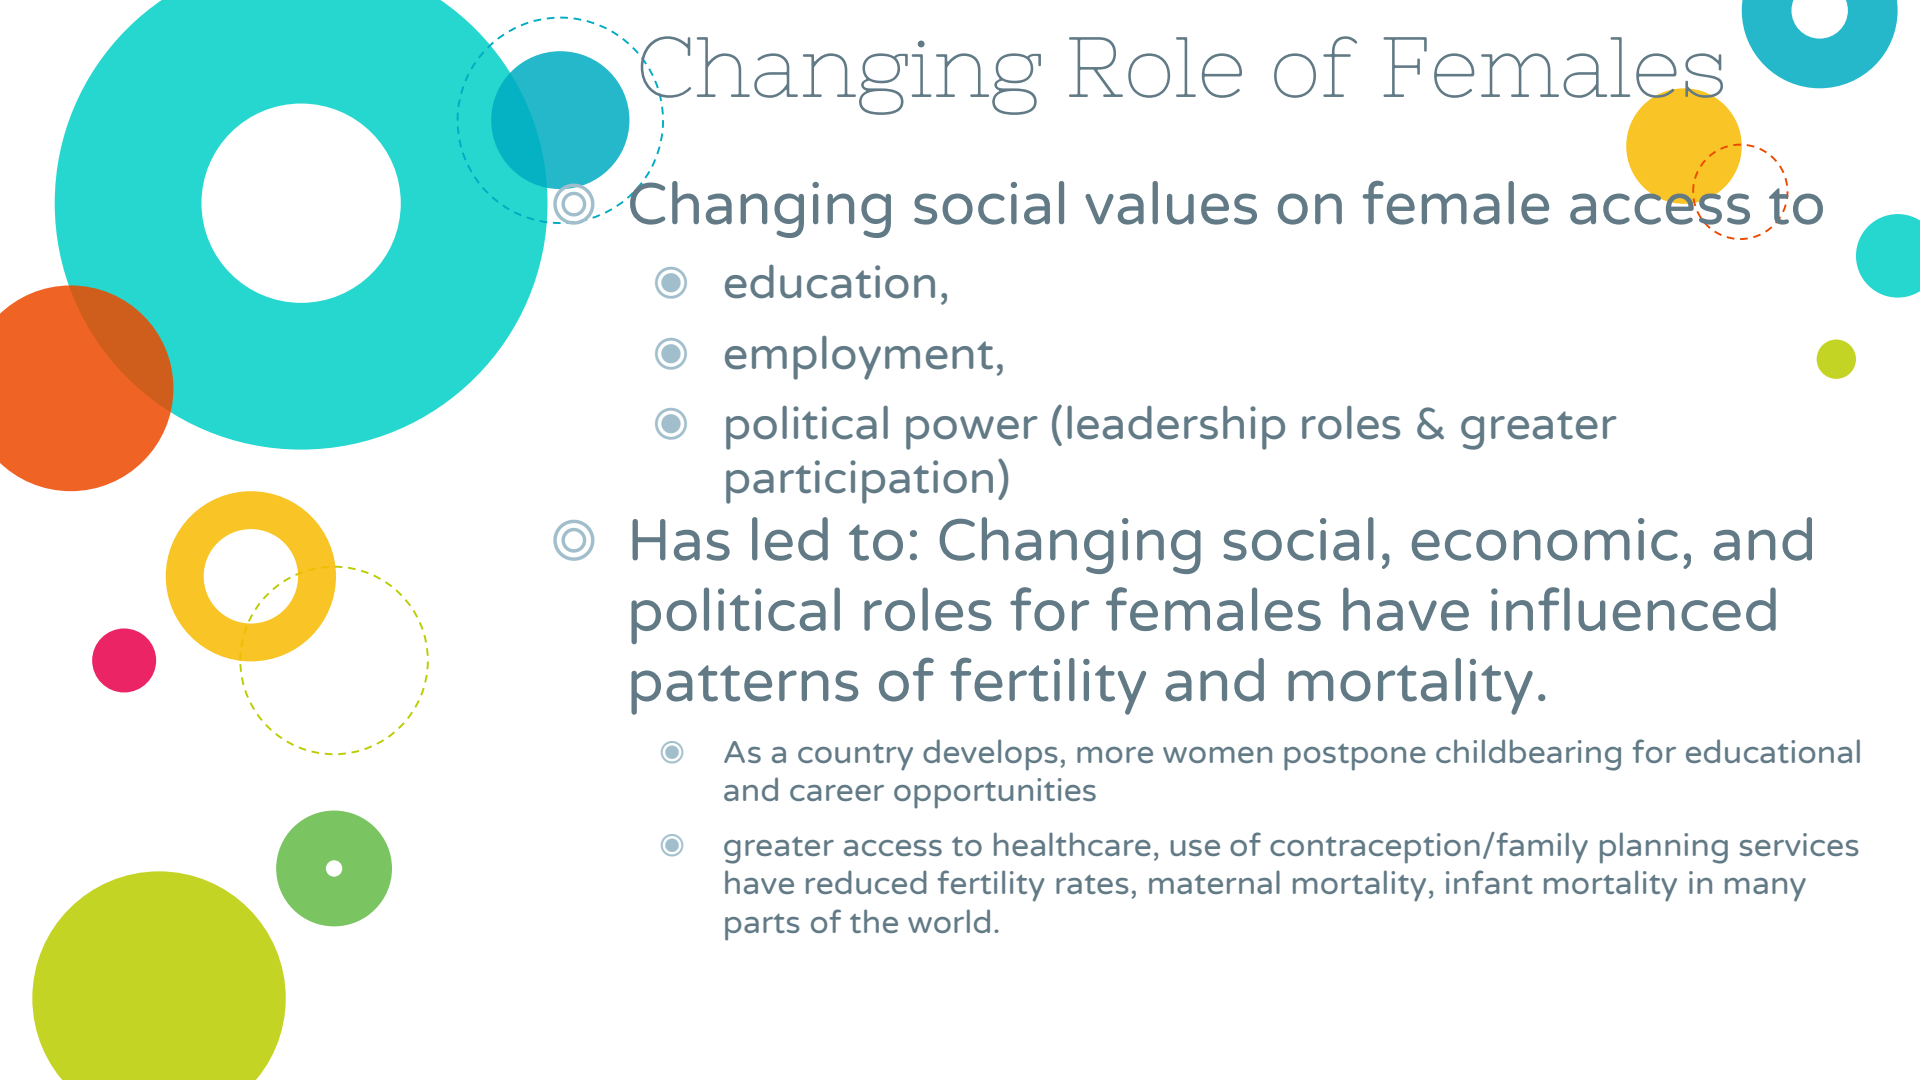

Education about family planning

Provision of contraceptives

Rigid and forced policies may be implemented

A decorative graphic featuring several overlapping circles in teal, lime green, orange, and pink. Dashed lines in light blue and yellow arc across the background, creating a sense of movement and design.

2.8 Women & Demographic Change

Changing Role of Females

◎ Changing social values on female access to

- ◎ education,
- ◎ employment,
- ◎ political power (leadership roles & greater participation)

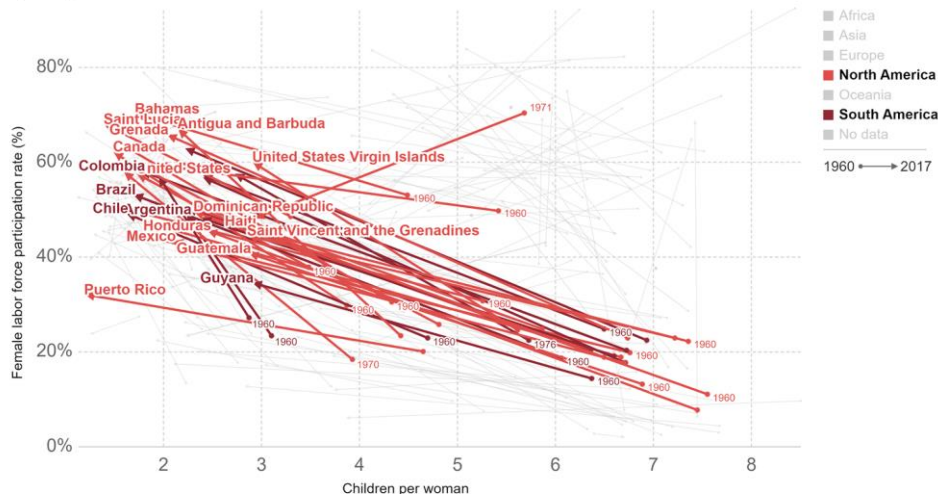

◎ Has led to: Changing social, economic, and political roles for females have influenced patterns of fertility and mortality.

- ◎ As a country develops, more women postpone childbearing for educational and career opportunities
- ◎ greater access to healthcare, use of contraception/family planning services have reduced fertility rates, maternal mortality, infant mortality in many parts of the world.

Fertility and female labor force participation

The labor force participation rate corresponds to the proportion of the population ages 15 and older that is economically active. Fertility corresponds to the number of children that would be born to a woman if she were to live to the end of her childbearing years and bear children in accordance with the age-specific fertility rates of the specific year.

Women & Demographic Change

1. What is the title of the chart?
2. What info is provided on the x-axis?
3. What info is provided on the y-axis?
4. What trends do you see?
5. What predictions can you make based on the trends?

own on the x-axis is the average number of years of schooling of women in the reproductive age (15 to 49 years). On the y-axis you find the 'total fertility rate' – the number of live births per woman in reproductive age.

5. What predictions can you make based on the trends?

Women and Demographic Change

AP HG 2.8

Population Policy Research

- ◎ You and a partner will be assigned a country to research their Population Policies
- ◎ You will log your research information into class shared document in Schoology.

AP Human Geography

Population Policies

Research your assigned country and complete the table on the second page of this document. When google searching, keep in mind your sources.

- 2022 [Overview of Population Trends](#) & See [2021 World Population Policies focus on fertility](#) (for specific case studies on Kenya, Argentina, Hungary, Australia, China and see appendix of report for list of all countries with fertility policies in place)

- Potential News Sources: [Associated Press \(AP\)](#), [Reuters](#), [BBC](#), [The Financial Times](#), [Bureau of Investigative Journalism](#), [Pew Research](#), [The Economist](#) (not an exhaustive list)

- In addition, you may utilize [Gale Research](#), [Encyclopedia Britannica](#) and other research tools via Class Link/CRHS Library. Be sure your articles and journals come from reputable publications (research coming out of the United Nations, World Bank, University produced research) not social media or Wikipedia.

- For an overview of population characteristics of your country (dependency ratios, population pyramids, age and gender distribution, etc.) on [World CIA Factbook People and Society Section](#).
- You may also learn about current policy initiatives from visiting your **countries' national government websites** (visit their health dept., women's development, or search for population policies). When finished you will have a detailed chart on the anti and pro natalist policies of a variety of countries. You will have to be treasure hunters, if you hit a roadblock during search, consider using different search inquiries)

Pro Natalist	Anti Natalist
The nation may have an aging population and high old age dependency ratio. The nation may have a shortage of economically active individuals.	The population is greater than the resources they have to support it. It may have a young population and high dependency ratio.
What do they do?	What do they do?
Some governments may offer incentives to have babies, advertise/education programs or restrict contraceptive use and/or abortions, encourage immigration	Education about family planning, advertise
Incentives can include money, extended maternity or paternity leave, free or subsidized child care, free or subsidized education	Provision of contraceptives; greater access to abortion, promote education and careers for women
	Rigid or forced policies

Example of Spread Sheet in Schoology

Country	Note below what country you have chosen to research	Student: Write names here to take ownership	Currently Pro or Anti?	Current Policy (Be detailed)	Past Policy: <i>Has the government changed their stance and/or attempted something different in the past?</i>	Place links to articles, reports you used in your research
India						
China						
Nigeria, Mali, Kenya, Niger or Burundi						
Iran or other middle eastern state						
Indonesia or Thailand
