

UNIT 1 LEARNING GUIDE

1. Listed below are the Learning Objectives for Unit 1. In the table below write your own exam question that covers the given objective. Use this to structure your own learning guide and better focus your study time. Also determine your confidence with each objective with the numerical key below.

KEY: 1= Not Confident 2 = Somewhat Confident
3 = Absolutely Confident

Unit 1 Learning Objective	Create Your Own Questions	Confidence
Use multiple representations to identify functions and justify what defines a function.		
Determine increasing and decreasing intervals of various functions.		
Identify the domain and range of various functions using interval, set, and/or inequality notation.		
Determine function values and describe their meaning from a given scenario.		
Determine the composite function from a given pair of functions.		
Evaluate composite functions at a constant, taking the domain into account.		

Unit 1 Learning Objective	Create Your Own Questions	Confidence
Identify properties (even, odd, neither) and types of functions (injective, surjective, bijective) from graphs, mappings, tables, equations, etc.		
Predict when a function will have an inverse based on the properties of that function.		
Find an inverse of various functions using tables, graphs, and equations, restricting the domain when necessary.		
Use properties of functions to explain the relationship between a function and its inverse.		
Represent rate of change graphically to/from a description of a scenario (distance/time, bottles, etc.).		
Identify and use patterns in given sets of data and connect to general functions.		
Use function patterns to predict values.		
Write piecewise functions given graphs.		
Graph piecewise functions given the equations.		
Use piecewise functions to represent and interpret a real-world scenario.		

2. What are your goals for the Unit 1 Exam? Remember that a Satisfaction Goal is the grade you would need to be satisfied with your work, and a Pride Goal is the grade necessary for you to feel pride in your work.

Satisfaction Goal = _____/100

Pride Goal = _____/100
