

UNIT 2 LEARNING GUIDE

1. Listed below are the Learning Objectives for Unit 2. In the table below write your own exam question that covers the given objective. Use this to structure your own learning guide and better focus your study time. Also determine your confidence with each objective with the numerical key below.

KEY: 1= Not Confident 2 = Somewhat Confident
3 = Absolutely Confident

Unit 2 Learning Objective	Create Your Own Questions	Confidence
Determine the effects of various transformations on a given parent function or a general function.		
Write the function notation that correctly transforms a graph.		
Perform arithmetic operations involving complex numbers, including the substitution of complex numbers into a function.		
Find attributes of quadratic functions (complex/real roots, y-intercept, vertex, etc.) from an equation.		
Convert from general to standard form of a quadratic equation and identify different attributes in each form.		
Algebraically manipulate different		

forms of conic equations to find and list all components for each conic.		
Write the standard form of a conic from key components or from a graph.		
Graph conics and identify key components.		
Demonstrate understanding of the locus definitions of conics.		
Find the inverse of a matrix without technology using row operations.		
Use matrices to model conics from given points.		
Solve real-world applications with conics.		

2. What are your goals for the Unit 2 Exam? Remember that a Satisfaction Goal is the grade you would need to be satisfied with your work, and a Pride Goal is the grade necessary for you to feel pride in your work.

Satisfaction Goal = _____/100
 _____/100

Pride Goal = _____
