

UNIT 3 LEARNING GUIDE

1. Listed below are the Learning Objectives for Unit 3. In the table below write your own exam question that covers the given objective. Use this to structure your own learning guide and better focus your study time. Also, determine your confidence with each objective with the numerical key below.

KEY: 1 = Not Confident 2 = Somewhat Confident
3 = Absolutely Confident

Unit 3 Learning Objective	Create Your Own Questions	Confidence
Simplify and evaluate exponential expressions using properties.		
Simplify and evaluate logarithmic expressions using properties.		
Expand or condense logarithmic expressions using properties.		
Write equations of exponential functions given a set of points or a graph.		
Use transformations to graph and identify key components of exponential functions.		
Use transformations to graph and identify key components of logarithmic functions.		
Evaluate logarithms without a calculator.		
Understand and use the number e as an exponential and logarithmic base.		
Identify situations as exponential growth or decay.		

Unit 3 Learning Objective	Create Your Own Questions	Confidence
Create and use models for exponential growth or decay from real-world scenarios (half-life, compound interest, etc.).		
Solve exponential and logarithmic equations by using their inverse relationship.		
Solve exponential and logarithmic equations by using a common base.		
Graph, evaluate, solve, and interpret logistic functions.		
Use function patterns to identify and predict values of exponential and logarithmic functions.		

2. What are your goals for the Unit 3 Exam? Remember that a Satisfaction Goal is the grade you would need to be satisfied with your work, and a Pride Goal is the grade necessary for you to feel pride in your work.

Satisfaction Goal = _____/100
 _____/100

Pride Goal = _____
