

UNIT 4A LEARNING GUIDE

1. Listed below are the Learning Objectives for Unit 4A. In the table below write your own exam question that covers the given objective. Use this to structure your own learning guide and better focus your study time. Also determine your confidence with each objective with the numerical key below.

**KEY: 1 = Not Confident 2 = Somewhat Confident
3 = Absolutely Confident**

*** must know reciprocal, quotient, and Pythagorean identities AND the Unit Circle ***

Unit 4A Learning Objective	Create Your Own Questions	Confidence
Use basic trigonometry to solve right triangles.		
Understand and use the reciprocal identities: cosecant, secant, and cotangent.		
Derive the quotient identities.		
Derive the Pythagorean identities.		
Construct the Unit Circle using the relationships found in special right triangles.		
Know the sign of the trigonometric values in each quadrant.		
Use trigonometric identities to simplify trigonometric expressions.		
Solve trigonometric equations by using trigonometric identities and algebraic techniques.		
Understand the concept of a radian.		
Find trigonometric ratios based on a given trigonometric value in a specified quadrant.		

Unit 4A Learning Objective	Create Your Own Questions	Confidence
Convert between degree and radian angle measure.		
Calculate coterminal angles in radians and degrees.		
Calculate trigonometric values from angles found on the Unit Circle.		
Graph the parent trigonometric functions – sine, cosine, tangent.		
Find the domain and range of sine, cosine and tangent functions.		

2. What are your goals for the Unit 4A Exam? Remember that a Satisfaction Goal is the grade you would need to be satisfied with your work, and a Pride Goal is the grade necessary for you to feel pride in your work.

Satisfaction Goal = _____/100

Pride Goal = _____/100
